Academic and Administrative Leadership in Kenya Michieka, Ratemo Waya,2017-05-03 Scholars especially those

interested in understanding how leadership has inhibited academic freedom and hindered effectiveness of institutions of higher learning have for long been engaged by the very important manner in which governance and leadership of higher education institutions in Africa is constituted and managed. The fact that there has been a dearth of work based on the experiences of those who have served as university leaders has created a major gap. Questions remain on how leaders of higher education institutions are identified, how they are prepared, the personal predispositions that individuals bring to the exercise of such positions and their personal experiences regarding what energizes or inhibits the performance of their work. Until recently presidents in most African countries served as chancellors of public universities; identification of those who served as university leaders was largely a political process. But much has changed with most countries establishing oversight bodies and the overall governance of higher education institutions divorced from the day to day political processes. *Trails in Academic and Administrative Leadership in Kenya* provides a personal account of the experiences in higher education leadership from an individual whose tenure in leadership straddled the two eras. In this book Prof Michieka provides an account of how his early education prepared him for roles in academic and institutional leadership in Kenya. The author shares his experiences on the trails he had to navigate as an academic, a vice chancellor and a chairperson of university council at a time when universities in Kenya were transiting from extreme government administrative control to a greater degree of operational autonomy. Readers will find in this work thought provoking insights on how leaders of higher education institutions in Kenya have had to balance between demands of the political system and the need to safeguard academic traditions in the everyday management of the institutions.

The Status of Student Involvement in University Governance in Kenya M. Mulinge, N. Arasa, 2017-05-05. This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students' involvement in governance processes and decision making. Data were collected from members of the student community utilizing a structured self-administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector. The guiding argument for the study was that shared governance, one of the principles of good governance, is critical in enabling the universities to deliver their visions and the missions effectively. The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play, in practice they continue to violate the core principles of good governance, particularly shared governance. Specifically, students who are major stakeholders in university education are largely excluded from significant structures of governance, thereby limiting their influence and participation. Although their representation is mainly provided via student self-governance organs, unions, associations and councils, their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors. Student active involvement in decision

making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya *Generating Actionable Climate Information in Support of Climate Adaptation and Mitigation* Andreas Marc Fischer,Janette Bessembinder,Fai Fung,Hans Olav Hygen ,Katharine Jacobs,2024-07-04 Climate change is under way in full extent adversely affecting more and more facets in nature society and economy The observations and the projections of these changes are increasingly important to consider in long term planning given the need to adapt to the multi sectoral climate impacts that can be anticipated In most cases it is the information on the local scale in a user oriented way that is most relevant in this context Over recent years many countries and organisations have set up climate services such as factsheets brochures web tools data to enable downstream applications and to form a decision support basis for climate action planning e g KNMI14 in the Netherlands UKCP18 in the UK CH2018 in Switzerland Climate Change in Australia NCA4 in the US Copernicus Climate Data Store C3S
