Savishinsky,2018-08-06 The topic of retirement becomes increasingly compelling as the U S population ages It s easy to find books about how to plan financially for those years after careers end but Breaking the Watch focuses on the many ways of creating a life not just making a living as a retired person This book follows women and men from a rural American community as they approach and experience the first years of retirement Joel Savishinsky focuses on the efforts people make to find meaning in a stage of life American culture often views in a confused or disdainful way In conversations and stories 13 men and 13 women demonstrate a deep commitment to defining their own retirement They bring to their mature years a diversity of backgrounds interests and responsibilities They include former teachers librarians doctors farmers lawyers bankers mail carriers and secretaries Some are married others divorced or single many have children and grandchildren but some have neither Their finances run the gamut from the modest to the munificent while their health ranges from robust to disabled From an examination of the rites of passage that marked their exit from full time work Breaking the Watch moves on to consider how to plan appropriately for retirement renegotiate ties to friends family and community and create a sense of passion be it for t ai chi travel painting or politics that will drive a new sense of purpose These intimate glimpses into real lives allow a rare understanding of the retirement process Engineering and Contracting ,1919 **The Wet and the Dry**

Patrick Vinton Kirch,1994 Scholars and researchers have long believed that the ability to irrigate is crucial to the development of civilizations In this book archaeologist Patrick Kirch challenges this hydraulic hypothesis and provides a more accurate and detailed account of the role of wet and dry cultivation systems in the development of complex sociopolitical structures Examining research on cultural adaptation and ecology in Western Polynesia and utilizing extensive data from a variety of important South Pacific sites Kirch not only reveals how particular systems of production developed within the constraints imposed by environmental conditions but also explores the tension that arises between contrasting productive systems with differential abilities to produce surplus He shows that the near total neglect of short fallow dryland

cultivation as well as arboriculture or tree cropping has seriously distorted the picture that archaeologists and anthropologists have of agricultural intensification and its relation to complex social structure This work likely to become a classic will be central to all future discussions of the ecology and politics of agricultural intensification *Japanese Business* Subhash Durlabhji, Norton E. Morgan, 2022-07-05 This grammar of Kenyan Sign Language KSL phonology adds to a sparse literature on the units of categorical form in the world's sign languages At the same time it brings descriptive and theoretical research on sign language phonology into better alignment by systematically evaluating current models of sign language phonology for each of the main parameters handshape location and movement against the KSL data This grammar also makes a methodological contribution by using a unique dataset of KSL minimal pairs in the analysis demonstrating that minimal pairs are not as infrequent in sign languages as previously thought The main content of the book is found in five chapters on handshape location core articulatory movement manner of movement and other distinctive features e.g orientation mouth actions The book also contains two large appendices that document the phonological evidence for each of the 44 handshapes and 37 locations This book will be a key reference for descriptive and typological studies of sign phonology as well as a helpful resource for linguists interested in understanding the similarities and differences between current models of sign phonology and identifying promising avenues for future research *A Review of Biodiversity and Socio-economics Research in Relation to Fisheries in Lake Victoria* J. B. Okeyo-Owuor, 1999 **???** Confucius, E. Bruce Brooks, A. thought as it evolved over almost the entire Warring States period **Hawaiki, Ancestral Polynesia** Patrick Vinton Kirch, Roger C. Green, 2001-03-15 The power of an anthropological approach to long term history lies in its unique ability to combine diverse evidence from archaeological artifacts to ethnographic texts and comparative word lists In this innovative book Kirch and Green explicitly develop the theoretical underpinnings as well as the particular methods for such a historical anthropology Drawing upon and integrating the approaches of archaeology comparative ethnography and historical linguistics they advance a phylogenetic model for cultural diversification and apply a triangulation method for historical reconstruction They illustrate their approach through meticulous application to the history of the Polynesian cultures and for the first time reconstruct in extensive detail the Ancestral Polynesian culture that flourished in the Polynesian homeland Hawaiki some 2 500 years ago Of great significance for Oceanic studies Kirch and Green s book will be essential reading for any anthropologist prehistorian linguist or cultural historian concerned with the theory and method of long term history
