Culturally Specific Pedagogy in the Mathematics Classroom Jacqueline Leonard, 2017-10-03 Culturally Specific Pedagogy in the Mathematics Classroom offers a wide variety of conceptual and curricular resources for teachers interested in teaching mathematics in a way that challenges stratification based upon race class gender and other forms of oppression that students face in today's world. With the publication of this book, all teachers will have available to them instructional strategies in mathematics for meeting the academic needs of culturally diverse students. They will have an explanation of the linkage between culture and students' mathematical cognition and problem solving. The ease in which Leonard brings the reader along and the caring way she tells a story about making mathematics a fun and social justice experience makes for an exciting learning opportunity for all students and teachers. Carl A. Grant, University of Wisconsin-Madison, United States. From the Foreword: Mathematics educators are in a period of deep concern about our ability to educate all students in mathematics. Most students of color do not have the opportunities to fully learn mathematics. Nothing more important can be done for these students and their teachers than to publish this book addressing the miseducation of these students and offering a way to change what we are doing. Carol E. Malloy, University of North Carolina-Chapel Hill, United States. This compelling text advocates the use of culturally specific pedagogy to enhance the mathematics instruction of diverse students. It accomplishes this by making clear the link between research and practice and offering lesson templates that teachers can use with ethnically and culturally diverse students and with females. Specifically, the text draws on sociocultural theory and research on culture and mathematics cognition to focus on three goals: using qualitative research to extend the literature on culturally based education to African American and Latina/o c **Inclusive and Accessible Secondary Science** Jane

Essex, 2023-07-20 Drawing on extensive professional experience and detailed empirical evidence, this resource sets out an insightful, highly practical approach to teaching science to secondary-aged students with learning difficulties and other special educational or additional support needs (SEND/ASN). The book explores the barriers that the secondary school science curriculum currently presents to those who do not learn in the expected way, before providing a wealth of practical strategies to help teachers in both specialist and mainstream settings to make science more accessible. Multiple science topics are covered in depth, including living and non-living matter, the periodic table, electrical energy, the solar system, the environment, and more. Each topic is supported by extensive teachers' notes outlining activities that will allow educational practitioners to enact the principles of accessibility in the classroom. With rich field notes and practical takeaways included to accompany key insights, this accessible book will provide science teachers at the secondary school level, as well as support staff and anyone aspiring to teach science to SEN/ASN learners, with the guidance and resources they need to make science education meaningfully inclusive. **The Times Index**, 2006 Indexes the Times Sunday Times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement **The**
