From Humanity To The Land Of The System:

Dehumanisation of Humanity , The Rational Universe Evolving for Humans Zhao Ding,2025-05-08 What if the development of life the birth of the earth and the emergence of humanity were all part of an intricate cosmic design timed with precision across billions of years In *The Rational Universe Evolving for Humans* the author explores the profound connections between the physical universe and the natural forces that shaped it From the Big Bang to the emergence of modern civilization this book uncovers the hidden patterns that have governed the cosmos from its earliest moments Blending science with philosophy the author challenges readers to consider the time effect the precise timing of every event that led to the world of today Could it all have been coincidence or is there a deeper logic at play in the natural world Whether one is a curious scientist a lover of philosophy or someone seeking a deeper understanding of our place in the universe *The Rational Universe Evolving for Humans* offers a compelling new perspective on the origins of human beings and civilization and the forces that continue to shape this world

Earth System Law: Standing on the Precipice of the Anthropocene Timothy Cadman,Margot Hurlbert,Andrea C. Simonelli,2021-12-13 This book systematically explores the emerging legal discipline of Earth System Law ESL challenging the closed system of law and marking a new era in law and society scholarship Law has historically provided stability certainty and predictability in the ordering of social relations predominantly between humans However in recent decades the Earth s relationship in law has changed with increasing recognition of the standing of Mother Earth inherent rights of the environment such as flora and fauna rivers and now recognition of the multiple relations of the Anthropocene This book questions the fundamental assumption that the law only applies to humans and that the earth as a system has intrinsic rights and responsibilities In the last ten years the planet has experienced its hottest period since human evolution and by the year 2100 unless substantive action is taken many species will be lost and planetary conditions will be intolerable for human civilisation as it currently exists Relationships between humans the biosphere and all planetary systems must change The authors address these challenging topics setting the groundwork of ESL to ensure sustainable development of the coupled socio ecological system that the Earth has become Earth System Law is an interdisciplinary and transdisciplinary research project and as such this book will be of great interest to researchers and stakeholders from a wide range of disciplines including political science anthropology economics law ethics sociology and psychology
