to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law enriching the long standing trope of viewing architectural regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international community of scholars curators and practitioners as well as the design work of international students tasked to explore what region means to them

Architecture, Power and National Identity Lawrence Vale, 2014-05-01 The first edition of *Architecture Power and National Identity* published in 1992 has become a classic winning the prestigious Spiro Kostof award for the best book in architecture and urbanism Lawrence Vale fully has fully updated the book which focuses on the relationship between the design of national capitals across the world and the formation of national identity in modernity Tied to this it explains the role that architecture and planning play in the forceful assertion of state power The book is truly international in scope looking at capital cities in the United States India Brazil Sri Lanka Kuwait Bangladesh and Papua New Guinea *Architecture and Identity* Peter Herrle, Erik Wegerhoff, 2008 This book brings together complex fields of knowledge and globally splintered discourses on a subject that is experienced not only by scholars but in the everyday lives of people around the world There is a common complaint about the loss of identity which to a substantial degree is being associated with the built environment in cities and specifically with their architecture *Architecture and Identity* takes a global multidisciplinary look on how identities in contemporary architecture are constructed The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity Some authors dismantle constructs of identity that have long been considered as solid and unbreakable while others meticulously unravel the construction process of identities in [Encyclopedia of Twentieth Century Architecture](#) R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 **The Environmental Brief** Richard Hyde, Steve Watson, York St John Business School Steve Watson, Wendy Cheshire, Mark Thomson, 2007-01-24 The built environment is responsible for an estimated forty five per cent of all greenhouse gas emissions As the greatest opportunities for reducing these emissions occur during the briefing and design processes the pathway to better design lies in preparing environmental briefs and using these to drive building design and produce buildings of high environmental performance This process driven book looks at the theoretical

issues involved in an environmental brief and outlines methods by which architects can approach the writing of a brief that considers all aspects of the natural and the built environment and relates these concepts to a number of case studies from around the world *The City in South Asia* James Heitzman,2008-03-31 With case studies in each chapter focusing on specific cities and including maps and photographs this book is a comprehensive survey of urbanization in South Asia during the last 5000 years **Colonial Modernities** Peter Scriver,Vikramaditya Prakash,2007-03-12 A carefully crafted selection of essays from international experts this book explores the effect of colonial architecture and space on the societies involved both the colonizer and the colonized Focusing on British India and Ceylon the essays explore the discursive tensions between the various different scales and dimensions of such empire building practices and constructions Providing a thorough exploration of these tensions Colonial Modernities challenges the traditional literature on the architecture and infrastructure of the former European empires not least that of the British Indian Raj Illustrated with seventy five halftone images it is a fascinating and thoroughly grounded exposition of the societal impact of colonial architecture and engineering
