In addition to the five main windows, SketchUp uses several different windows, such as the Component window that's open in Figure 1-1. You can open and close these as needed by using the Window menu. With the tools in these windows, you'll apply color and shading to your models, select prefabricated components, add shadows and lighting effects, and export your project.

Don't Be Afraid to Play

When you get started, don't be too afraid to play. SketchUp is a 3D modeling software, and it's designed to be fun. You can create a 3D model of anything you can imagine, and you can export it as a 3D file or a 2D image. The software is designed to be easy to use, and it's designed to be fun. SketchUp's menu bar is styled with the most popular, such as File, Edit, Window, and Help. SketchUp's View menu is a little different from the ones in most programs (Figure 1-2). The View menu has items in the SketchUp window that you can show or hide, including things like the drawing guides, wire frame, measurement tools, and view different models. If you're looking for tools that change over time of the SketchUp window, such as a 3D view or the tool, look under the Window menu.
