THE EARLY GRADE READING ASSESSMENT Amber K. Gove, Anna Wetterberg, 2011-09-28 The Early Grade Reading Assessment EGRA measures students progress towards reading EGRA gauges early literacy skills through a 15 minute individual oral assessment of five fundamental reading skills RTI worked with education experts to develop the EGRA in 2006 and it has been piloted and implemented in more than 40 countries This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA and to share this knowledge with practitioners policymakers and international donors Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education *South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI **Flexible Multilingual Education** Jean-Jacques Weber, 2014-05-12 This book examines the benefits of multilingual education that puts children s needs and

interests above the individual languages involved It advocates flexible multilingual education which builds upon children s actual home resources and provides access to both the local and global languages that students need for their educational and professional success It argues that as more and more children grow up multilingually in our globalised world there is a need for more nuanced multilingual solutions in language in education policies The case studies reveal that flexible multilingual education rather than mother tongue education is the most promising way of moving towards the elusive goal of educational equity in today s world of globalisation migration and superdiversity Linguistic Atlas of South Africa Van der Merwe, I.J.,Van der Merwe, J.H.,2007-02-01 This atlas maps various time space dimensions of South Africa s remarkable linguistic diversity to cast the geography of language within the conceptual framework of geolinguistics It shows how historical patterns of spatial language preponderance have developed to produce current patterns and allows understanding of the way landscape has become regionally ingrained in the vocabulary of languages Here language is cast as a barometer of the social dynamics processes of space and place spatial convergence regional competition expansion and dominance segregation and assimilation ethnicity social ecology language identity social interaction and migration trends **'Along the Routes to Power'** Martin Pütz,Joshua A. Fishman,JoAnne Neff-van Aertselaer,2011-12-22 The present volume grew out of the 30th International LAUD Symposium held on April 19 22 2004 at the University of Koblenz Landau in Landau Germany The conference Empowerment through Language was centrally concerned with the concept of power and or empowerment as observed in the status and use of language s and their speakers in bilingual and multilingual communities The book discusses the theoretical issues inherent in the relation between language and power the empowerment strategies involved in language policy and language planning situations and the issue of language endangerment in Africa i e the fate of minority languages and their speakers and the sociopolitical factors perpetuating their exclusion from access to knowledge and skills The volume constitutes a collection of papers by prominent linguists from many countries who explore the exciting interdisciplinary area of language power and linguistic empowerment Broadly speaking the papers focus on the theoretical and sociolinguistic problems related to the role of power in language policy and language planning situations in multilingual settings language choices code switches and associated topics Thus the aim of the volume is to open up language policy and language planning issues as observed in multilingual contexts nations institutions other settings and domains to the wider community of critical sociolinguistics by concentrating on the relationship between language and power More particularly it offers a decidedly sociolinguistic perspective to the study of language and power which likewise has been tackled from other perspectives in the areas of sociology and political science This interdisciplinary relationship is important both for linguistics and for the sociology of language In this way the book is an important contribution to general linguistics sociolinguistics minority issues in multilingual settings as well as the social sciences In honor of his upcoming 80th birthday 2006 Fishman s colleagues and former students are preparing five volumes by him or about him this being one of them **Glimpses into**

Perspectives on Multigrade Teaching Linley Cornish, Matshidiso Joyce Taole, 2021-10-25 This book contains the

results of research projects carried out in relation to multigrade teaching in Australia and South Africa Research in multigrade contexts is not commonly reported and rarely in book form The research results have implications for multigrade teachers government education personnel and university teacher educators The book also contains chapters with practical advice for multigrade teachers including examples of multigrade teaching used in an Australian seven grade class kindergarten to grade 6 Other chapters contain suggestions for practical strategies a multigrade teacher can use to reduce the workload involved in planning for multiple grades Very little is published in the area of multigrade teaching yet the number of multigrade schools worldwide is huge Developed countries still have a significant proportion of multigrade schools commonly one fifth to one third of all primary schools or classes Despite decades of centralisation of schools and expansion of transport networks the number of these schools remains high mostly in rural areas Developing countries established multigrade schools in rural areas in order to achieve the UN Millennium Development Goal of Universal Primary Education Yet specific training to teach a multigrade class remains virtually non existent in initial teacher education programs worldwide The value of this book is thus to report specific research carried out in multigrade contexts but also to provide practical help for multigrade teachers This help is needed as the teachers strive to achieve the UN Sustainable Development Goal of a quality education through helping their students develop the skills and behaviours required for 21st century learning

Silence Maria-Luisa Achino-Loeb, 2005-12-01 This book is about silence and power and how they interact It argues that only by studying how silence works how it is implicated in the construction of meaning can we arrive at the elusive roots of power in all its dimensions Silence becomes the currency of power by delineating the margins or what we perceive and through a sleight of hand wherein behaviors undertaken in the service of self interest appear instead as inevitable and devoid of human agency The theoretical load of this argument is carried by vivid ethnographic material dealing with music linguistic behavior racial conflicts work dislocations and the construction of anthropological subjects and texts
