Grey Kangaroo Diagram:

Tree-kangaroos of Australia and New Guinea Roger William Martin, 2005 To many people the suggestion that a kangaroo could live up a tree is fantasy Yet in the rainforests of Far North Queensland and New Guinea there are extraordinary kangaroos that do just that Many aspects of these marsupials anatomy and biology suggest a terrestrial kangaroo ancestor Yet no one has so far come forward with a convincing explanation of how why and when mammals that was so superbly adapted for life on the ground should end up back in the trees This book reviews the natural history and biology of tree kangaroos from the time of their first discovery by Europeans in the jungles of West Papua in 1826 right up to the present day covering the latest research being conducted in Australian and New Guinea Combining information from a number of disparate disciplines the author sets forth the first explanation of this apparent evolutionary conundrum Features Provides a fascinating and readable account of an unusual evolutionary conundrum Written by a field biologist with more than a decade s experience working with tree kangaroos *Macropods* Graeme Coulson, Mark Eldridge, 2010-02-03 This book covers the proceedings of a major 2006 symposium on macropods that brought together the many recent advances in the biology of this diverse group of marsupials including research on some of the much neglected macropods such as the antilopine wallaroo the swamp wallaby and tree kangaroos More than 80 authors have contributed 32 chapters which are grouped into four themes genetics reproduction and development morphology and physiology ecology and management The book examines such topics as embryonic development immune function molar progression and mesial drift locomotory energetics non shivering thermogenesis mycophagy habitat preferences population dynamics juvenile mortality in drought harvesting overabundant species road kills fertility control threatened species cross fostering translocation and reintroduction It also highlights the application of new techniques from genomics to GIS *Macropods* is an important reference for academics and students researchers in molecular and ecological sciences wildlife and park managers and naturalists **Language, Knowledge and Pedagogy** Frances Christie, J. Biodiversity and Environmental Change Emma

Burns,Andrew Lowe,Nicole Thurgate,David Lindenmayer,2014-02-06 This data rich book demonstrates the value of existing national long term ecological research in Australia for monitoring environmental change and biodiversity Long term

ecological data are critical for informing trends in biodiversity and environmental change The Terrestrial Ecosystem Research Network TERN is a major initiative of the Australian Government and one of its key areas of investment is to provide funding for a network of long term ecological research plots around Australia LTERN LTERN researchers and other authors in this book have maintained monitoring sites often for one or more decades in an array of different ecosystems across the Australian continent ranging from tropical rainforests wet eucalypt forests and alpine regions through to rangelands and deserts This book highlights some of the temporal changes in the environment that have occurred in the various systems in which dedicated field based ecologists have worked Many important trends and changes are documented and they often provide new insights that were previously poorly understood or unknown These data are precisely the kinds of data so desperately needed to better quantify the temporal trajectories in the environment in Australia By presenting trend patterns and often also the associated data the authors aim to catalyse governments and other organisations to better recognise the importance of long term data collection and monitoring as a fundamental part of ecologically effective and cost effective management of the environment and biodiversity
