

Chapter 9 – Food and Agriculture AP Human Geography – Reading Guide **ANSWERS**

Key Issue 1 – Where Did Agriculture Originate?
Rubenstein 12e, Pgs. 308-311

1. Define agriculture: deliberate modification of earth's surface through cultivation of plants and rearing of animals to obtain sustenance or economic gain
2. Define cultivate: "to care for" usually a crop or a farm animal
3. Define the agricultural revolution: a time when humans first domesticated plants and animals and no longer relied entirely on hunting and gathering
4. When did the agricultural revolution occur? How can scientists be certain about that date?
Around 6000 BC because that's when the world's population began to grow at a more rapid rate - indicating that humans had larger and more stable sources of food and more people survived
5. Explain the factors that contributed to the agricultural revolution:
 - Environmental factors - climate change caused a redistribution of humans, animals and plants as the earth moved out of the ice age
 - Cultural factors - preference for living in a fixed location rather than nomads would have encouraged people to learn how to farm and begin permanent settlements
6. Label the crops and animals that were first domesticated in each of the regions of the map:

Human Geography Thomas L. Bell, 1997 **The Need for a Cultural Landscape Theory** Alexandru Calcatinge, 2012

The research in this book was born from an intellectual curiosity regarding the concept of cultural landscape. The study resulted from a desire to clarify and expand the understanding of the term as the starting point was the idea that a good practice is always based on a well built theory. Thus the purpose is to establish the importance of theoretical knowledge of the concept of cultural landscape. Series Urban and Spatial Planning Stadt und Raumplanung Vol 12 Fieldwork for Human Geography Richard Phillips, Jennifer Johns, 2012-03-28

A highly readable and superbly fun guide to the why and how of doing fieldwork in human geography. I recommend it highly to any geographer wannabes and practicing geographers. The latter group including myself might well rediscover the fun of doing geography. Professor Henry Yeung National University of Singapore. An excellent introduction to the art and science of fieldwork. It makes clear that fieldwork is not just about getting out of the classroom and gaining first hand experience of places. It is about instilling passion about those places. Professor Stuart C Aitken San Diego State University. An indispensable guide to fieldwork that will enrich the practice of geography in a myriad of different ways. In particular the diverse materials presented here will encourage students and academics alike to pursue new approaches to their work and instil a greater understanding of the conceptual and methodological breadth of their discipline. Professor Matthew Gandy University College London. If fieldwork is an indispensable component of geographical education then this book is equally essential to making the most of fieldwork. This book gives students the tools to realise the full potential of what for many is the highlight of their geography degree. Professor Noel Castree Manchester University. Fieldwork is a core component of Human Geography degree courses. In this lively and engaging book Richard Phillips and Jennifer Johns provide a practical guide to help every student get the most out of their fieldwork. This book encourages students to engage with fieldwork critically and imaginatively. Explains methods and contexts. Links the fieldwork with wider academic topics. It looks beyond the contents of research projects and field visits to address the broader experiences of fieldwork: working in groups, understanding your ethical position, developing skills for learning and employment and opening your eyes, ears and minds to the wider possibilities of your trip. Throughout the book the authors present first person descriptions of field experiences and predicaments written by fieldtrip leaders and students from around the world including the UK, Canada, Singapore, Australia and Africa.

Applied Geography: Issues, Questions, and Concerns M.S. Kenzer, 2013-11-11. The completion of this collection took many months and for a variety of reasons required the assistance and/or indulgence of a number of individuals. First and foremost I would like to thank Tim Hudson for his useful input and support at the outset of the project. Likewise I would like to thank Jesse O McKee for providing a hospitable environment during my affiliation with the University of Southern Mississippi. At Louisiana State University I am grateful to Sam Hilliard and Carville Earle for their invaluable understanding. The book became part of the GeoJournal Library as a result.

of Wolf Tietze's confidence in the topic and because of Henri G van Dorssen's and Kluwer Academic Publishers' good nab lre despite numerous problems Curtis C Roseman and the remainder of the Geography Department at the University of Southern California where I completed many last minute details for the volume are to be thanked for the cordial and warm environment I received while a visitor in Los Angeles Finally no multi authored collection reaches completion without the help of many patient contributors This particular book suffered many set backs along the way so I am particularly grateful to the authors herein They demonstrated their compassion and exceptional professionalism throughout by never second guessing my decisions and by allowing me to remedy the set backs in my own way They were a pleasure to work with and they should take pride in their achievements
