Key Finalexamstudyguide Fall2013:

Who's the New Kid in Chemistry? John D. Butler, 2013-12-12 *Who's the New Kid in Chemistry* offers an unprecedented look at student engagement and teacher best practices through the eyes of an educational researcher enrolled as a public high school student. Over the course of seventy-nine consecutive days, John D. Butler participates in and observes Rhode Island 2013 Teacher of the Year Jessica M. Waters's high school chemistry class, documenting his experiences as they unfold. *Who's the New Kid in Chemistry* is a compelling example of what can be accomplished when an educational researcher and teacher collaborate in the classroom. This work includes a discussion on flexible homework assignments, data-driven instruction, and thirty teacher best practices. This book is an invaluable resource for teachers across all content areas, masters and doctoral research method classes, and future Teachers of the Year. **Teaching Psychology** Douglas A. Bernstein, 2014-06-26

This volume provides thoroughly updated guidelines for preparing and teaching an entire course in psychology. Based on best principles and effective psychological and pedagogical research, it offers practical suggestions for planning a course, choosing teaching methods, integrating technology appropriately and effectively, developing student evaluation instruments and programs, and ideas for evaluation of your own teaching effectiveness. While research-based, this book was developed to be a basic outline of what to do when you teach. It is intended as a self-help guide for relatively inexperienced psychology teachers, whether graduate students or new faculty, but also as a core reading assignment for those who train psychology instructors. Experienced faculty who wish to hone their teaching skills will find the book useful too.
