Fig. 4

Operators Safety Precautions

Accidents still occur when using balers - some of them fatal. The MAF 15 and 20 balers incorporate more safety features than required by U.K. or continental regulations and the avoidance of accidents depends primarily on the operator.

ALWAYS disengage the P.T.O. drive, stop the tractor engine, allow the pickers to reach bottom dead centre, and apply the tractor wheel brakes before working on the baler.

ALWAYS observe the above procedure when threading the needles.

ALWAYS replace any guards if these have been removed for any reason.

ALWAYS keep well clear of the pickup.

ALWAYS keep hands clear of the knitter and needle gate when the baler is attached to the tractor and the tractor engine is running.

ALWAYS ensure that the P.T.O. guards are fitted and in good working condition.

ALWAYS use a tractor big enough when using the baler on steep slopes.

ALWAYS keep children away from machines when they are operating.

ALWAYS take care not to trap hands between the flywheel and flywheel cover when turning the machine by hand.

ALWAYS BE CAREFUL. Even after observing these requirements accidents can still happen.
