**Nature's Building Blocks** John Emsley, 2001 **Green and Sustainable Advanced Materials, Volume 2** Shakeel Ahmed, Chaudhery Mustansar Hussain, 2018-10-08 Sustainable development is a very prevalent concept of modern society This concept has appeared as a critical force in combining a special focus on development and growth by maintaining a balance of using human resources and the ecosystem in which we are living The development of new and advanced materials is one of the powerful examples in establishing this concept Green and sustainable advanced materials are the newly synthesized material or existing modified material having superior and special properties These fulfil today's growing demand for equipment machines and devices with better quality for an extensive range of applications in various sectors such as paper biomedical textile and much more Volume 2 provides chapters on the valorization of green and sustainable advanced materials from a biomedical perspective as well as the applications in textile technology optoelectronics energy materials systems and the food and agriculture industry *From Arsenic to Zirconium* Peter Davern, 2020-05-05 93 short poems that teach about the elements of the periodic table Indulge your love of the periodic table with this collection of poems and fun facts about the chemical elements that make up our world From arsenic to zirconium this book describes the characteristics history and quirks of each element The poems are a launching point for a guided tour of the elements filled with fascinating scientific trivia For instance Antimony used to treat constipation in the Middle Ages may have killed Mozart There's arsenic in your prawns But don't worry it won't harm you Erbium is used to dope optical fiber amplifiers that make your YouTube videos download faster Iridium was key to the meteor theory of why dinosaurs went extinct You'll find potassium in both bananas and gunpowder Sulfur plays a role in whether your hair is curly or straight Expand your library of scientific literature with this playful and poetic romp through the periodic table **The Matter of History** Timothy J. LeCain, 2017-07-31 New insights into the microbiome epigenetics and cognition are radically challenging our very idea of what it means to be human while an explosion of neo materialist thinking in the humanities has fostered a renewed appreciation of the formative powers of a dynamic material environment The Matter of History brings these scientific and humanistic ideas together to develop a bold new post anthropocentric understanding of the past one that reveals how powerful organisms and things help to create humans in all their dimensions biological social and cultural Timothy J LeCain combines cutting edge theory and detailed empirical analysis to explain the extraordinary late nineteenth

century convergence between the United States and Japan at the pivotal moment when both were emerging as global superpowers Illustrating the power of a deeply material social and cultural history The Matter of History argues that three powerful things cattle silkworms and copper helped to drive these previously diverse nations towards a global Great Convergence **Minerals in Africa** Francis Gudyanga, 2020-08-10 Africa's dire need to industrialize is universally acknowledged and it is evident that the continent's vast mineral resources can catalyze that industrialization This requires the promotion of local beneficiation and value addition of minerals to yield materials on which modern Africa's industry and society can rely This book is therefore about transforming Africa's comparative advantages in minerals into the continent's competitive edge regarding materials Mineral beneficiation and value addition form the basis and provide opportunities for mineral driven Africa's industrialization The scope of the book is three fold with inter connected relationships Information Technical and Policy oriented It will be a useful reference material for mining undergraduate students on beneficiation and value addition of each of the minerals found in Africa The book while presenting a broad overview of beneficiation and value addition of Africa's minerals provides crucial starting material for postgraduate research students and R D institutions who wish to delve into more advanced methods of extraction and utilization of mineral derived materials that are in Africa for the purpose of industrialization of the continent **Evolution of Bioenergetics from Elements to Life** David F.

Stowe, 2025-01-08 This book begins with the creation of the elements used in life and how these elements as atoms bound together into organic compounds and polymerized into lipids peptides and nucleotides The text stresses the role and importance of the elements C H O N P S the univalent and multivalent ions and the requirement of liquid water to foster prebiotic life Expert author Dr David Stowe explains the role of early molecular interactions in developing the first living prokaryote bacteria and their eventual engulfment as organelles to make eukaryotes that allowed their sophistication into specialized cells and large multicellular organisms The book uniquely traces the genesis of bioenergetics and uses cardiac cell mitochondria as an evolutionary example for modern bioenergetic function This book is geared toward graduate students post doctoral fellows and other academics interested in evolutionary biochemistry with an emphasis on the early development of bioenergetics leading to modern high energy mitochondria **The Periodic Table** Eric R. Scerri, 2020 The

Periodic Table Its Story and Its Significance traces the evolution and development of the periodic table from Mendeleev's 1869 first published table and onto the modern understanding provided by modern physics **Nanophotonics, Nanooptics, Nanobiotechnology, and Their Applications** Olena Fesenko, Leonid Yatsenko, 2019-07-31 This book highlights some of the latest advances in nanotechnology and nanomaterials from leading researchers in Ukraine Europe and beyond It features contributions from participants in the 6th International Science and Practice Conference Nanotechnology and Nanomaterials NANO2018 in Kiev Ukraine on August 27-30 2018 organized by the Institute of Physics of the National Academy of Sciences of Ukraine University of Tartu Estonia University of Turin Italy and Pierre and Marie Curie University

France Internationally recognized experts from a wide range of universities and research institutions share their knowledge and key results on nanooptics energy storage and biomedical applications This book s companion volume also addresses topics such as materials properties behavior and synthesis

**Radioecology** R. J. Pentreath, 2021-08-12 Natural radiation arises from many sources from the unstable atoms within our own bodies and in the materials around us from the Sun and even from beyond the Solar System Additional sources include the legacy of testing nuclear weapons nuclear waste and nuclear accidents All these sources have provided means of dating environmental materials and tracing the movements of substances through land sea and air But ionising radiation also interacts with DNA which has led to a remarkable range of studies to examine how and how quickly these unstable atoms are accumulated by both humans and biota and their various effects on both Providing an overview of the sources uses and impacts of ionising radiation in the environment and the frameworks developed to manage exposures to them this is a valuable reference for graduate students and researchers interested in radioecology environmental science and radiological protection
