

INTRODUCTION

The Electro-Voice Model BHD Diffraction Horn is an exponentially flared horn designed for use with recommended triode driver units such as the Electro-Voice Models 700T and 701A.

GENERAL DESCRIPTION

The Model BHD unit employs the diffraction principle in combination with the extreme exponential flare to provide smooth and adequate dispersion of the "pressure" or "baffle" range. The result is a "spread" of sound that affords adequate coverage of the entire listening area—this is especially important in classrooms or auditoriums. The BHD horn is of rugged sheet-steel construction and is finished in a non-reflective matte black to insure "clean-through". The horn is designed for crossover at 400 cps with an appropriate crossover network such as the Electro-Voice Model RN. Actual horn cutoff is 600 cps. This overlap eliminates disturbances often caused by operating horn crossover points too close to cutoff points.

RECOMMENDATIONS FOR USE

The BHD horn is recommended for use with all Electro-Voice triode drivers, but will enhance the performance of alternate drivers with a throat which will accept a 3-5/8" x 18 driver.
