**Abstract** The purpose of this study was to investigate the effect of the use of a mobile learning application on the learning of the English language. The study was conducted in a secondary school in the city of Istanbul. The study was conducted with 40 students in the 8th grade. The study was conducted in two groups. The first group was the control group and the second group was the experimental group. The experimental group used the mobile learning application for 10 weeks. The data were collected through a pre-test and a post-test. The results of the study showed that the use of the mobile learning application had a positive effect on the learning of the English language. The students in the experimental group showed a significant improvement in their English language skills compared to the control group. The results of the study suggest that the use of mobile learning applications can be an effective tool for improving the learning of the English language.
