Transcutaneous Electrical Nerve Stimulation (TENS) Mark I. Johnson, 2014-03-06 Transcutaneous electrical nerve stimulation TENS is a technique that delivers mild electrical currents across the intact surface of the skin to reduce pain TENS is used by practitioners throughout the world to manage painful conditions and TENS equipment can be purchased by the general public so that they can self administer treatment There are thousands of experimental and clinical research studies published on TENS and related techniques yet there is uncertainty about the best way to administer TENS in clinical practice This is because currents used during TENS can be administered in

a variety of ways and the findings of research studies have been inconclusive This book provides guidance on how best to use TENS based on an evaluation of current research evidence The book covers what TENS is how it works and safe and appropriate clinical techniques for many conditions including chronic low back pain osteoarthritis and cancer pain It also offers solutions to the problems faced by researchers when trying to design clinical trials on TENS Accessibility written Transcutaneous Electrical Nerve Stimulation TENS provides a comprehensive coverage of research issues and findings about TENS and will be essential reading for healthcare professionals practitioners and students **Manual of Practical**
