Elementary Number Theory An Algebraic Approach Ethan D Bolker:

Elementary Number Theory Ethan D. Bolker, 2007-03-15 This text uses the concepts usually taught in the first semester of a modern abstract algebra course to illuminate classical number theory theorems on primitive roots quadratic Diophantine equations and the Fermat conjecture for exponents three and four The text contains abundant numerical examples and a particularly helpful collection of exercises many of which are small research problems requiring substantial study or outside reading Some problems call for new proofs for theorems already covered or for inductive explorations and proofs of theorems found in later chapters

Certain Number-Theoretic Episodes In Algebra Sivaramakrishnan R, R Sivaramakrishnan, 2006-09-22 Many basic ideas of algebra and number theory intertwine making it ideal to explore both at the same time *Certain Number Theoretic Episodes in Algebra* focuses on some important aspects of interconnections between number theory and commutative algebra Using a pedagogical approach the author presents the conceptual foundations of commutative algebra

Certain Number-Theoretic Episodes In Algebra, Second Edition R Sivaramakrishnan, 2019-03-19 The book attempts to point out the interconnections between number theory and algebra with a view to making a student understand certain basic concepts in the two areas forming the subject matter of the book

Canadian Mathematical Bulletin , 1974-09 **Common Sense Mathematics** Ethan D. Bolker, Maura B. Mast, 2016-05-04 *Common Sense Mathematics* is a text for a one semester college level course in quantitative literacy The text emphasizes common sense and common knowledge in approaching real problems through popular news items and finding useful mathematical tools and frames with which to address those questions We asked ourselves what we hoped our students would remember about this course in ten years time From that ten year perspective thoughts about syllabus what topics should we cover seemed much too narrow What matters more is our wish to change the way our students minds work the way they approach a problem or more generally the way they approach the world Most people skip the numbers in newspapers magazines on the web and more importantly even in financial information We hope that in ten years our students will follow the news confident in their ability to make sense of the numbers they find there and in their daily lives Most quantitative reasoning texts are arranged by mathematical topics to be mastered Since the mathematics is only a part of what we hope students learn we've chosen another strategy We look at real life stories that can be best understood with careful reading and a little mathematics
