The Analytic Art François Viète, T. Richard Witmer, 2006-01-01 This historic work consists of several treatises that developed the first consistent coherent and systematic conception of algebraic equations Originally published in 1591 it pioneered the notion of using symbols of one kind vowels for unknowns and of another kind consonants for known quantities thus streamlining the solution of equations Francois Vi te 1540 1603 a lawyer at the court of King Henry II in Tours and Paris wrote several treatises that are known collectively as The Analytic Art His novel approach to the study of algebra developed the earliest articulated theory of equations allowing not only flexibility and generality in solving linear and quadratic equations but also something completely new a clear analysis of the relationship between the forms of the solutions and the values of the coefficients of the original equation Vi te regarded his contribution as developing a systematic way of thinking leading to general solutions rather than just a bag of tricks to solve specific problems These essays demonstrate his method of applying his own ideas to existing usage in ways that led to clear formulation and solution of equations
