Finding Ellipses: What Blaschke Products, Poncelet's Theorem, and the Numerical Range Know about Each Other Ulrich Daepf, Pamela Gorkin, Andrew Shaffer, Karl Voss, 2018 Mathematicians delight in finding surprising connections between seemingly disparate areas of mathematics Finding Ellipses is a delight filled romp across a three way unexpected connection between complex analysis linear algebra and projective geometry

Ellipses Inscribed in, and Circumscribed about, Quadrilaterals Alan Horwitz, 2024-05-29 The main focus of this book is disseminating research results regarding the pencil of ellipses inscribing arbitrary convex quadrilaterals In particular the author proves that there is a unique ellipse of maximal area EA and a unique ellipse of minimal eccentricity EI inscribed in Q Similar results are also proven for ellipses passing through the vertices of a convex quadrilateral along with some comparisons with inscribed ellipses Special results are also given for parallelograms Researchers in geometry and applied mathematics will find this unique book of interest Software developers image processors along with geometers mathematicians and statisticians will be very interested in this treatment of the subject of inscribing and circumscribing ellipses with the comprehensive treatment here Most of the results in this book were proven by the author in several papers listed in the references at the end This book gathers results in a unified treatment of the topics while also shortening and simplifying many of the proofs This book also contains a separate section on algorithms for finding ellipses of maximal area or of minimal eccentricity inscribed in or circumscribed about a given quadrilateral and for certain other topics treated in this book Anyone who has taken calculus and linear algebra and who has a basic understanding of ellipses will find it accessible
