Architecture and Retrenchment Helena Mattsson,2023-01-26 Shortlisted for the Architects Sweden Critic s Award 2023 Scholars in architectural and urban history have over the last decade been trying to come to terms with architecture s neoliberal turn and its various impacts from municipal policy to the artistic imagination However most scholarship has focussed on generalizations with very little work to date focussing on specific cases Architecture and Retrenchment brings one such case to the fore investigating the relation between architecture and the Swedish Model of the welfare state It tracks the response of architecture to the gradual retrenchment and ultimate dismantling of the Swedish welfare state which was in its heyday world famous for its integration of architecture and the built environment into the welfare system Ultimately neoliberal economics prevailed yet this book reveals how new architectural strategies and techniques were developed in order to protect the agency of architecture in the newly reorganised society of the 1980s and 1990s Through eight in depth case studies the book situates the often abstract generalised discourse of neoliberalism and privatisation in specific architectural sites and provides an original interpretation of how architecture space aesthetics and politics converged at the end of the twentieth century *Keywords Index to U.S. Government Technical Reports* United States. Department of Commerce. Office of Technical Services,1962 **Succession to the Throne in Early Modern Russia** Paul

Bushkovitch,2021-03-18 This revisionist history of succession to the throne in early modern Russia from the Moscow princes of the fifteenth century to Peter the Great argues that legal primogeniture never existed the monarch designated an heir that was usually the eldest son only by custom not by law Overturning generations of scholarship Paul Bushkovitch persuasively demonstrates the many paths to succession to the throne where designation of the heir and occasional elections were part of the relations of the monarch with the ruling elite and to some extent the larger population Exploring how the forms of designation evolved over the centuries as Russian culture changed and in the later seventeenth century made use of Western practices this study shows how when Peter the Great finally formalized the custom in 1722 by enshrining the power of the tsar to designate in law this was not a radical innovation but was in fact consistent with the experience of the previous centuries **Robotics, AI and the Future of Law** Marcelo Corrales,Mark Fenwick,Nikolaus Forgó,2018-11-02 Artificial intelligence and related technologies are changing both the law and the legal profession In particular technological advances in fields ranging from machine learning to more advanced robots including sensors virtual realities algorithms bots drones self driving cars and more sophisticated human like robots are creating new and previously unimagined challenges for

regulators These advances also give rise to new opportunities for legal professionals to make efficiency gains in the delivery of legal services With the exponential growth of such technologies radical disruption seems likely to accelerate in the near future This collection brings together a series of contributions by leading scholars in the newly emerging field of artificial intelligence robotics and the law The aim of the book is to enrich legal debates on the social meaning and impact of this type of technology The distinctive feature of the contributions presented in this edition is that they address the impact of these technological developments in a number of different fields of law and from the perspective of diverse jurisdictions Moreover the authors utilize insights from multiple related disciplines in particular social theory and philosophy in order to better understand and address the legal challenges created by AI Therefore the book will contribute to interdisciplinary debates on disruptive new AI technologies and the law
