A History of Farming Systems Research Michael P. Collinson, 2000 This book provides a detailed history of farming systems research FSR While it includes the application of FSR to developed country agriculture its main focus is on FSR in its original role with small scale resource poor farmers in less developed countries There are some 40 contributions from nearly 50 contributors from 20 countries illustrating both the diversity and yet the coherence of FSR The five parts of the book cover 1 FSR understanding farmers and their farming FSR origins and perspectives understanding farming systems 2 the applications of farming systems research FSR in technology choice and development FSR in extension and policy formulation 3 institutional commitment to FSR FSR some institutional experiences in national agricultural research dimensions of the organization of FSR training for FSR 4 FSR the professional dimension regional and international associations FSR and the professional

disciplines and 5 cutting edge methods abiding issues and the future for FSR **Agro-tribulations** ,2004 **La méthode IDEA** Lionel Vilain,2008 La méthode IDEA est une méthode globale d'évaluation de la durabilité des systèmes agricoles selon les axes agroécologique, socioterritorial et économique. Elle constitue un outil d'autoévaluation qui montre les faiblesses techniques et les voies de progression possibles *Penser et agir en agronome* Jean Boiffin, Thierry Doré, 2012-12-12 Michel Sebillotte a été une personnalité marquante du monde agronomique au cours des dernières décennies. Pédagogue brillant, la pensée intarissable, leader charismatique et visionnaire, il a contribué à refonder les bases de l'agronomie et a ouvert des perspectives de grande portée pour la recherche agronomique et le développement agricole. Dans tous les domaines où il a œuvré, il a laissé un apport conceptuel et méthodologique majeur et fondé des communautés de travail laïques durables et fécondes. Cet ouvrage rassemble les contributions de plusieurs dizaines d'auteurs qui ont tissé les liens collégiaux et amicaux. Il est composé de textes d'analyse sur les apports de M. Sebillotte à l'enseignement et la recherche en agronomie au développement agricole, la prospective au développement régional et plus globalement aux orientations stratégiques de la recherche agronomique, ainsi que de témoignages et points de vue plus particuliers et parfois plus personnels. Ainsi rassemblés, ces textes permettent de mesurer l'étendue et la richesse de la vie et de l'œuvre de M. Sebillotte. Au-delà de l'hommage à une personnalité marquante et attachante, ils apportent un éclairage inédit sur cinquante années d'évolution de la discipline agronomique, de la recherche agronomique et du développement agricole en France. Cet ouvrage s'adresse non seulement aux personnes qui ont eu la chance de côtoyer M. Sebillotte à un moment de leur parcours, mais aussi un vaste public d'enseignants et chercheurs en sciences agronomiques, d'ingénieurs et responsables du développement agricole et plus généralement de lecteurs intéressés par l'histoire récente de l'agronomie et de l'agriculture **Electronic Journal of Knowledge Management** , *Modélisation des agroécosystèmes et aide à la décision* Eric Malézieux, Guy Trébuil, Marc Jaeger, 2001 Du peuplement végétal au champ cultivé et de l'exploitation agricole au territoire, différents types et degrés d'interdisciplinarité sont mis en œuvre : des sciences biophysiques aux sciences de gestion pour mieux appréhender les dynamiques agroécologiques et socioéconomiques. En s'appuyant sur des situations agricoles concrètes et des expériences variées dans des milieux tempérés ou tropicaux, cet ouvrage contribue à préciser les différentes manières de concevoir, de laborer et d'utiliser les modèles et la place de la modélisation dans l'aide à la décision au sein des agroécosystèmes **Sustainable Food Processing** Brijesh K. Tiwari, Tomas Norton, Nicholas M. Holden, 2013-12-31 Sustainable Food Processing Food processors face numerous challenges from ever changing economic, social and environmental conditions. With global inequalities increasing, ingredient costs climbing and global climate change becoming a major political issue, food producers must now address environmental concerns, social responsibility and economic viability when shaping their food processing techniques for the future. Food production, preservation and distribution contribute to greenhouse gas emissions from the agri-food sector; therefore food producers require detailed, industrially relevant information that addresses these challenges. The food industry as one of the world's largest users of

energy must embrace new ways of meeting the needs of the present without compromising future viability It is important that the industry does not merely focus on simple indicators of sustainability that are relatively easy to calculate and hold appeal for governments and the public but which do not properly address the many dimensions of sustainability This book provides a comprehensive overview of both economic sustainability and the environmental concerns that relate to food processing It is divided into four sections Part one deals with principles and assessment of sustainability in the context of food processing Part two summarises sustainability in various food processing applications within the food industry Part three considers sustainability in food manufacturing operations that are vital in food production systems and Part four addresses sustainable food distribution and consumption As the most comprehensive reference book for industry to date this book will provide engineers educators researchers policy makers and scientists working in the food industry with a valuable resource for their work

The Interactions of Human Mobility and Farming Systems on Biodiversity and Soil Quality in the Western Highlands of Cameroon Mubeteneh Tankou, 2014-01-22 Population growth and the drop in the returns from the major cash crop coffee for small farmers are the main drivers that have influenced the farming systems and mobility of farmers in the Western Highlands of Cameroon The main objective of the research that led to this book was to determine the interactions between farming systems and human mobility in this region of Cameroon A comparative study was conducted through household and field surveys in three villages and conceptualized based on the systems approach The different types of mobility were influenced by household social factors the quest for high valued farm plots and hired labour Urban rural migration contributed to occupation diversification and social mobility The sustainability factor was a function of land use intensity intensity of off farm inputs the household adjustment factor and mobility of the household The sacred groves were rich in plant diversity of varied ecological and economic importance Nitrogen mining was common at all levels of the farming system These determinants and types of mobility claims are pertinent to the research area the sustainability results of the farming systems reflect the reality on the ground the nutrient flux evaluated at the crop and farm levels constitute a valuable database for future research

Mémo visuel d'agronomie Benjamin Nowak, 2024-02-07 Si l'agronomie peut se révéler une science difficile appréhender pour les étudiants qui la découvrent les datavisualisations réunies dans cet ouvrage permettent de comprendre en un regard les enjeux et défis qui fondent le raisonnement agronomique Couvrant une variété d'échelles allant de la simple parcelle agricole aux changes mondialisés de denrées alimentaires il offre une synthèse de données issues de disciplines diverses telles que l'écophysiologie la génétique ou encore les sciences humaines et sociales Chaque notion est abordée sous la forme d'une double page qui associe textes synthétiques et infographies en couleurs Abordant l'histoire de l'agriculture les grands enjeux contemporains et une ouverture sur les problématiques et solutions futures cet ouvrage se révélera un outil précieux pour comprendre le monde agricole d'aujourd'hui

Landscape Agronomy Davide Rizzo, Elisa Marraccini, Sylvie Lardon, 2022-09-09 The landscape is widely identified as a relevant target

both by integrative policies and across the disciplines dealing with resource management and territorial planning Landscape agronomy promotes a greater involvement of agricultural sciences into this arena by increasing the attention on the dynamics relating the farming practices to the natural resources and the temporal and spatial patterns of land covers This book covers the background that improved the transdisciplinary interface of agronomy with spatially explicit disciplines like landscape ecology and geography both in research and in training programs in addition to some experiences of participative landscape management On these bases the state of art on cutting edge data availability and methodological issues is used to select and discuss some worldwide case studies This selection of research topic examples underpins the concluding discussions about challenges ahead Researchers as well as policy and decision makers are the main target of this book that seeks to provide a toolbox of concepts examples and ideas to improve the understanding of agricultural landscapes Agricultural activities manage the greatest share of land surface on Earth with fast paced changes compared to any other human land use With this book we aim at providing a stronger interface between agricultural science and landscape design processes

Agronomie, 1991 **Systems Studies in Agriculture and Rural Development** Jacques Brossier, L. de Bonneval, Etienne Landais, 1994 **Landscape Ecology** Francoise Burel, Jacques Baudry, 2003-01-05 This book is intended as a resource for students and researchers interested in developmental biology and physiology and specifically addresses the larval stages of fish Fish larvae and fish embryos are not small juveniles or adults Rather they are transitional organisms that bridge the critical gap between the singlecelled egg and sexually immature juvenile Fish larvae represent the stage of the life cycle that is used for differentiation feeding and distribution The book aims at providing a single volume treatise that explains how fish larvae develop and differentiate how they regulate salt water and acid base balance how they transport and exchange gases acquire and utilise energy how they sense their environment and move in their aquatic medium how they control and defend themselves and finally how they grow up
