Fake News on the Internet Alan R. Dennis, Dennis F. Galletta, Jane Webster, 2023-09-26 This book provides a review of current research in fake news and presents six new empirical research studies examining its impact Fake news has garnered immense public attention following the 2016 Brexit referendum three US elections the 2019 Indian lynchings and so on Fake news undermines public life across the globe especially in countries where journalistic practices and institutions are weak Some fake news is created to spread ideological messages or to create mischief whereas other fake news is created for profit Research shows that fake news spreads farther faster and more broadly than true news and has had major societal impacts All signs indicate that it will get worse as political activists scammers alternative news media and hostile governments become more sophisticated in their production and targeting of fake news This book features leading scholars who provide a review of the current research and presents six new empirical research studies examining its impact Some of this research shows how inventions designed to reduce fake news can actually have the opposite effect and instead act to increase the spread of fake news Other research takes a longer term perspective by measuring or inserting emotions into headlines allowing us to examine some of the roots of fake news behaviors for future study This shows how challenging the fake news phenomenon is to solve Fake News on the Internet will be a key resource for academics researchers and advanced students of Media Studies Research Methods Information Systems Communication Studies Management Cultural Studies and Sociology The chapters included in this book were originally published as a special issue of Journal of Management Information Systems

Environment, Social Justice, and the Media in the Age of the Anthropocene Elizabeth G. Dobbins, Luigi Manca, Maria Lucia Piga, 2020-02-17 Environment Social Justice and the Media in the Age of Anthropocene addresses three imminent challenges to human society in the age of the Anthropocene The first challenge involves the survival of the species the second the breakdown of social justice and the third the inability of the media to provide global audiences with an adequate orientation about these issues The notion of the Anthropocene as a geological age shaped by human intervention implies a new understanding of the human context that influences the physical and biological sciences Human existence continues to be affected by the physical and biological reality from which it evolved but in turn it affects that reality as well This work addresses this paradox by bringing together the contributions of researchers from very different disciplines in conversation about the complex relationships between the physical biological world and the human world to offer different perspectives and solutions in establishing social and environmental justice in

the age of the Anthropocene
