Howard,Ernest Zebrowski,2010-03-11 the authors sound a pessimistic note about society s short term memory in their sobering able history of Camille Booklist This highly readable account aimed at a general audience excels at telling the plight of the victims and how local political authorities reacted The saddest lesson is how little the public and the government learned from Camille Highly recommended for all public libraries especially those on the Gulf and East coasts Library Journal online As the unsettled social and political weather of summer 1969 played itself out amid the heat of antiwar marches and the battle for civil rights three regions of the rural South were devastated by the horrifying force of Category 5 Hurricane Camille Camille s nearly 200 mile per hour winds and 28 foot storm surge swept away thousands of homes and businesses along the Gulf Coast of Louisiana and Mississippi Twenty four oceangoing ships sank or were beached six offshore drilling platforms collapsed 198 people drowned Two days later Camille dropped 108 billion tons of moisture drawn from the Gulf onto the rural communities of Nelson County Virginia nearly three feet of rain in 24 hours Mountainsides were washed away quiet brooks became raging torrents homes and whole communities were simply washed off the face of the earth In this gripping account Ernest Zebrowski and Judith Howard tell the heroic story of America s forgotten rural underclass coping with immense adversity and inconceivable tragedy Category 5 shows through the riveting stories of Camille s victims and survivors the disproportionate impact of natural disasters on the nation s poorest communities It is ultimately a story of the lessons learned and in some cases

tragically unlearned from that storm hard lessons that were driven home once again in the awful wake of Hurricane Katrina Emergency responses to Katrina were uncoordinated slow and at least in the early days woefully inadequate Politicians argued about whether there had been one disaster or two as if that mattered And before the last survivors were even evacuated a flurry of finger pointing had begun The question most neglected was What is the shelf life of a historical lesson Ernest Zebrowski is founder of the doctoral program in science and math education at Southern University a historically black university in Baton Rouge Louisiana and Professor of Physics at Pennsylvania State University s Pennsylvania College of Technology His previous books include *Perils of a Restless Planet Scientific Perspectives on Natural Disasters* Judith Howard earned her Ph D in clinical social work from UCLA and writes a regular political column for the Ruston Louisiana Morning Paper Category 5 examines with sensitivity the overwhelming challenges presented by the human and physical impacts from a catastrophic disaster and the value of emergency management to sound decisions and sustainability John C Pine Chair Department of Geography Anthropology and Director of Disaster Science Management Louisiana State University
