Geography Mamorandum Gradenovember2013:

The Geography of Injustice Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history

Manhood Acts Michael Schwalbe, 2015-11-17 In *Manhood Acts* Michael Schwalbe offers a new perspective on the social construction of manhood and its relationship to male domination Schwalbe argues that study of masculinity has lost touch with its feminist roots and has been seduced by the politically safe notion of multiple masculinities *Manhood Acts* delineates the practices males use to construct women and men as unequal categories Schwalbe reclaims the radical feminist insights that gender is a field of domination not a field of play and that manhood is fundamentally about exerting or resisting control *Manhood Acts* arrives at the conclusion that abolishing gender as a system of oppression will require more than transgressive self presentation It will be necessary to end the exploitive economic relationships that necessitate manhood itself

After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers *After the Education Wars* helps us to see a better way forward Cathy N Davidson The New York Times Book Review *After the Education Wars* is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world *After the Education Wars* explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused

on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools [Amaza Lee Meredith Imagines Herself Modern](#) Jacqueline Taylor, 2023-11-28 The extraordinary life and work of architect Amaza Lee Meredith and the role modernism and material culture played in the aspiring Black American middle class of the early twentieth century Amaza Lee Meredith Imagines Herself Modern tells the captivating story of Amaza Lee Meredith a Black woman architect artist and educator born into the Jim Crow South whose bold choices in both life and architecture expand our understanding of the Great Migration and the Harlem Renaissance while revealing the importance of architecture as a force in Black middle class identity Through her charismatic protagonist Jacqueline Taylor derives new insights into the experiences of Black women at the forefront of culture in early twentieth century America caught between expectation and ambition responsibility and desire Central to Taylor's argument is that Meredith's response to modern architecture and art like those of other Black cultural producers was not marginal to the modernist project instead her work reveals the tensions and inconsistencies in how American modernism has been defined In this way the book shines a necessary light on modernism's complexity while overturning perceived notions of race and gender in relation to the modernist project and challenging the notion of the white male hero of modern architecture [South African national bibliography](#), 1999 Classified list with author and title index

[A World More Concrete](#) N.D.B. Connolly, 2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period In A World More Concrete N D B Connolly uses the history of South Florida to unearth an older and far more complex story Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan growth and racial peace under white supremacy Using a materialist approach he offers a long view of capitalism and the color line following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century A World More Concrete argues that black and white landlords entrepreneurs and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth Through a political culture built on real estate South Florida's landlords and homeowners advanced property rights and white property rights especially at the expense of more inclusive visions of equality For black people and many of their white allies uses of eminent domain helped to harden class and color lines Yet for many reformers confiscating certain kinds of real estate through eminent domain also promised to help improve

housing conditions to undermine the neighborhood influence of powerful slumlords and to open new opportunities for suburban life for black Floridians Concerned more with winners and losers than with heroes and villains *A World More Concrete* offers a sober assessment of money and power in Jim Crow America It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve revealing property owners power to reshape American cities in ways that can still be seen and felt today

The Russian State and Russian Energy Companies, 1992-2018 Ingerid M. Opdahl, 2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia's foreign policy in the post Soviet region The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018 Energy companies roles in institutional development enabled them to influence foreign policy formation and they became available as tools to implement foreign policy The extent to which it happened for each company varied with their accessibility to the Russian state Institutional development increased state capacity in a way that strengthened Russia's political regime The book shows how the combined power of several companies in the gas oil electricity and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia's regional position In this way Russia's energy resources were converted to regional influence The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post Soviet states

From Head Shops to Whole Foods Joshua C. Davis, 2017-08-08 In the 1960s and 70s a diverse range of storefronts including head shops African American bookstores feminist businesses and organic grocers brought the work of the New Left Black Power feminism environmentalism and other movements into the marketplace Through shared ownership limited growth and democratic workplaces these activist entrepreneurs offered alternatives to conventional profit driven corporate business models By the middle of the 1970s thousands of these enterprises operated across the United States but only a handful survive today Some such as Whole Foods Market have abandoned their quest for collective political change in favor of maximizing profits Vividly portraying the struggles successes and sacrifices of these unlikely entrepreneurs *From Head Shops to Whole Foods* writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption social enterprise buying local and mission driven business while also showing how today's companies have adopted the language but not often the mission of liberation and social change

Cyclescapes of the Unequal City John G. Stehlin, 2019-10-01 A critical look at the political economy of urban bicycle infrastructure in the United States Not long ago bicycling in the city was considered a radical statement or a last resort and few cyclists braved the inhospitable streets of most American cities

Today however the urban cyclist represents progress and the urban renaissance City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental social and economic health of the city and its residents *Cyclescapes of the Unequal City* contextualizes and critically examines this new wave of bicycling in American cities exploring how bicycle infrastructure planning has become a key symbol of and site of conflict over uneven urban development John G Stehlin traces bicycling's rise in popularity as a key policy solution for American cities facing the environmental economic and social contradictions of the previous century of sprawl Using in depth case studies from San Francisco Philadelphia and Detroit he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable environmentally friendly and innovation based urban capitalism While advocates envision a more sustainable city for all the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race class and space *Cyclescapes of the Unequal City* speaks to a growing interest in bicycling as an urban economic and environmental strategy its role in the politics of gentrification and efforts to build more diverse coalitions of bicycle advocates Grounding its analysis in both regional political economy and neighborhood based ethnography this book ultimately uses the bicycle as a lens to view major shifts in today's American city

From GCSEs to EBCs Great Britain. Parliament. House of Commons. Education Committee, 2013 The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government's plans The report also questions how well the Government's proposals will serve lower attaining pupils who are often the most disadvantaged There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs The Government is also called upon to re think its plans for a Statement of Achievement specifically for lower attaining pupils MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system MPs also note the wide ranging stakeholder opposition to many of the Government's proposals
