departure from conventional studies that treat art and architecture as compendia of objects for analysis Ingold proposes an anthropology and archaeology not of but with art and architecture He advocates a way of thinking through making in which sentient practitioners and active materials continually answer to or correspond with one another in the generation of form Making offers a series of profound reflections on what it means to create things on materials and form the meaning of design landscape perception animate life personal knowledge and the work of the hand It draws on examples and experiments ranging from prehistoric stone tool making to the building of medieval cathedrals from round mounds to monuments from flying kites to winding string from drawing to writing The book will appeal to students and practitioners alike with interests in social and cultural anthropology archaeology architecture art and design visual studies and material culture The Interiors Theory Primer William Mangold, 2025-07-31 In a world where life is increasingly defined by the spaces we inhabit understanding interiors is essential to understanding ourselves The Interiors Theory Primer maps the intellectual terrain of interior design and spatial experience introducing readers to key concepts that shape how people occupy interior spaces Organized into three parts this book begins with foundational concerns such as place identity materiality and atmosphere and then examines the boundaries and expertise of the discipline before turning to critical and emerging topics like biophilia virtuality and social justice Each chapter presents a focused literature review of a major theme in interiors theory supported by key design precedents and suggestions for further reading Drawing on a wide range of scholarship The Interiors Theory Primer offers a coherent framework for understanding interiors as a distinct interdisciplinary field deeply embedded in the human condition Accessible to students useful to professionals and provocative for scholars The Interiors Theory Primer argues that the designed environments in which we live work and gather deserve greater attention not only for their aesthetic and functional qualities but also for their powerful role in shaping contemporary life **Surfaces** Mike Anusas, Cristián Simonetti, 2020-02-24 In attending to surfaces as they wrap layer and grow within sentient bodies material formations and cosmological states this volume presents a series of ten anthropological studies stretching across five continents and in observation of earthly practices of making knowing living and dying Through theoretically reflecting on time spent with Aymara and Mapuche Andean cultures the Malagasy people of Madagascar craftspeople and designers across Europe and Oceania amongst the architectures of Australia and South Korea and within the folds of books screens landscape and the sea the anthropologists in this volume communicate diverse ways of considering working with and knowing surfaces Together these writings advance a knowledge of the world which resists any definitive settlement of existential categories and rather seeks to know the world in its emergence and transformation as entities grow cohere shift dissolve decay and are reborn through the contact and exchange of surfaces persisting with varying time power and effect The book principally invites readers from anthropology the creative arts and environmental studies but also across the wider humanities and social sciences as well as those in neighbouring scientific fields of archaeology biology geography geoscience

Detailing Worlds Eric Bellin, 2025-02-06 In the 21st century the word detail appears constantly in discussions of building and we use it in many different ways yet just over 250 years ago detail meant nothing at all particular to the work of architects engineers or builders *Detailing Worlds* is the first book to examine the origins and evolution of detail as a concept with meanings specific to practices of building By exploring how past meanings and roles were ascribed to detail in different worlds of practice those of academics technicians students engineers and architects *Detailing Worlds* looks to the future illuminating the ways disciplinary knowledge and the concepts on which it is based evolve and change over time It is a story about how such concepts are slowly but constantly reconceived redefined and transformed by individuals as they interact with one another and how this process is shaped by the ever changing sociocultural and technological dimensions of the world around us Richly illustrated with more than 200 images including figures from rare texts archival student drawings and practitioners construction documents from the 18th through 20th centuries *Detailing Worlds* ventures to tell the history of a disciplinary specific idea and offer insights about how we think and speak about the practice of building today
