

# ACOG Screening Guidelines for At-Risk Women

---

Breast MRI screening is not recommended for women with an average risk for breast cancer.

Women with an estimated 20% or greater lifetime risk of breast cancer based on risk models, but who are either untested or test negative for *BRCA* gene mutations, may undergo “enhanced screening.”

Enhanced screening is recommended for women positive for *BRCA1* and *BRCA2* mutations; discuss risk reduction methods.
