Baker,2021-12-01 The Action Plan for Australian Birds 2020 is the most comprehensive review of the status of Australia s
avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every decade
since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable
bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of
over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many decades
This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate
change as a threatening process most obviously in Queensland s tropical rainforests where many birds are being pushed up
the mountains However the effects are also indirect as happened in the catastrophic fires of 2019 20 Many of the newly listed
birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news
stories too especially on islands where there have been spectacular successes with predator control Such uplifting results
demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and
threats alleviated *The Best 386 Colleges, 2021 Edition* . The Princeton Review,Robert Franek,2020-08 The Best 386
