

Methods could include: advertising in local papers OR local television, leaflets, mailshots to customer base, free food samples, discount vouchers, competitions.

(c) Identify and explain two factors that would affect Kyle's choice of source of finance. [4]

Relevant points might include: • Amount needed he has some savings so might not need much money • What finance is needed for as would use different sources for buying ingredients or the shop • Timespan to buy ingredients is likely to be short term /if to buy franchise – long term so he needs to decide how • Financial status as just starting to trade he will not have many options • Interest rates if high, likely to have to pay a lot if borrow \$100000

(d) Identify and explain two factors that Kyle should consider when choosing a suitable location for his business. [6]

Factors could include: • Demand/customers: enough people to have sale/revenue • Cost of rent a busy city centre location will cost more which as new cannot afford • Competition: if other fast food businesses nearby customers might be loyal to them so will not chose Frydays • Guidelines from Frydays could state where restaurant has to be so has little choice • Access to right type of employees as needs to hire employees • Enough space as needs somewhere to cook as well as serve • Space for parking so ease of access for food deliveries

(e) Do you think that owning a franchise would mean Kyle is 'certain to make a profit?' Justify your answer. [6]

Relevant points might include: • Has to give royalties/share of profits to Frydays so little profit for himself • Less risk than sole trader so higher possible sales/customers as its leading name • Total costs might be too high • Franchisor will pay for some costs, e.g. promotion reducing Kyle's fixed costs • Limited influence over decisions so not able to make choices to increase sales enough • Negative publicity about Frydays will affect all franchises so sales and profits could suffer through no fault of Kyle • Customer tastes might change so demand for fast food falls • Actions of competitors so sales might fall • Business is not guaranteed to succeed if he chooses the wrong location; might not make enough sales / get customers

5 (a) Identify two features of an economic boom.

Points might include: Low unemployment, high GDP, rising business sector profits, rising rates of inflation, (possible) shortage of skilled workers, business costs rising, higher demand, higher incomes.

(b) Identify two possible advantages to mine workers of being members of a trade union. [2]

Points could include: negotiate for higher wages, better working conditions, improved health and safety, collective bargaining power, advice, legal support, social benefits.

(c) Identify and explain two possible advantages to GGC's management of its mine workers of being members of a trade union. [4]

Points might include: • Disputes can be solved more quickly so mining operations are not delayed • Help agree changes, e.g. if union agree to longer shifts miners are likely to accept the change • No need to negotiate with individual workers • Less time wasted in arguments so managers can

Krämer, 2021-06-29 The economy of the 21st century in the OECD countries and in China is characterized by a new phenomenon the structural surplus of private savings in relation to private investment This is true even in a situation of prosperity and very low interest rates On the one hand this excess saving is due to people's increasing inclination to save in light of rising life expectancy driven by the desire to have sufficient assets in old age On the other hand the demand for capital is not increasing to the same extent so that investment is not keeping pace with the rising desire to save The resulting gap between the private desire for wealth and private investment can only be closed by increasing public debt This open access book offers a new capital theoretical perspective on the macroeconomic relationship between desired wealth and investment and it presents new empirical data on private wealth and its composition in the OECD plus China area The authors argue that a free economic and social order can only be stabilized if the wealth aspirations of individuals are met under conditions of price stability This is not possible without substantial net public debt A new way of thinking about the economy as a whole is required By way of an in depth theoretical and empirical analysis the book demonstrates this new way of thinking and describes the current challenges facing economic policy It will appeal to economists and students of economics who are interested in macroeconomic theory and its economic policy implications An impressive and convincing theoretical dive into the fundamentals behind secular stagnation with very strong implications for actual debt policy Public debt may be needed to improve welfare Olivier Blanchard Senior Fellow at the Peterson Institute for International Economics and Professor of Economics Emeritus at Massachusetts Institute of Technology MIT Chief Economist at the International Monetary Fund from 2008 to 2015 **Saving and Investment in the Twenty First Century** gives a wholly new perspective on macroeconomics Weizsäcker and Krämer describe a simple practical solution to the underemployment that has plagued Southern Europe for more than a decade George Akerlof Nobel Laureate in Economics 2001 Professor at the McCourt School of Public Policy at Georgetown University and Professor of Economics Emeritus at the University of California Berkeley This is a profound and original contribution that can help us to understand and act on the great issues of our times Nicholas Stern Grantham Research Institute on Climate Change and the Environment at the London School of Economics Author of the Stern Review Report on the Economics of Climate Change Chief Economist at the World Bank from 2000 to 2003 [ACCA Paper P6 Advanced Taxation FA2012 Practice and revision kit](#) BPP Learning Media, 2013-01-01 The examiner reviewed P6 Practice and Revision Kit provides invaluable guidance on how to approach the exam and contains past ACCA exam questions for you to try to

Shadow Networks Francisco Louçã,Michael Ash,2018-10-03 The 2007 08 financial crisis surprised many economists and the public But how did the crisis come about why was it so deep and why has the clean up been so slow and painful Many accounts of the crisis focus on renegade activity in marginal financial sectors Shadow Networks challenges this pervading view and sets out to demonstrate that far from a dissident branch the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank based finance The collapse was not an accident but baked into the system of finance from the start Shadow Networks traces the complex web of power that caused crisis and gives vivid descriptions of the actors in the quarter century leading up to 2007 to explain how the now decade long crisis took shape Shadow Networks Financial Disorder and the System that Caused Crisis is a probing examination of the roles of the powerful elite It traces the networks and institutions that support a finance focused market centered model of economy and society from their ascendancy to their surprising resilience in the face of manifest failures

Discrimination, Vulnerable Consumers and Financial Inclusion Cătălin-Gabriel Stănescu,Asress Adimi Gikay,2020-12-28 This book addresses the questions of discrimination vulnerable consumers and financial inclusion in the light of the emerging legal socioeconomic and technological challenges New technologies such as artificial intelligence driven consumer credit risk assessment and Fintech platforms the changing nature of vulnerability due to the ongoing COVID 19 pandemic as well as the sophistication of digital technologies which help circumvent legal barriers and protections necessitate the continuous study of the existing legal frameworks and measures that are capable of tackling these challenges Organized in two major parts the first addresses from multiple national angles the idea of a human rights approach to consumer law in order to replace the mantra of economic efficiency that characterizes financial services with those of human dignity and freedom from discrimination and from debt induced servitude The second tackles the challenges posed by increased usage of technology in connection with financial services which tends to solve but also creates additional issues for consumers in general and for vulnerable groups in particular
