

Name: _____ Date: _____

PHYSICS: ELECTRICITY & MAGNETISM

Activity: PHET Balloons and Sweater

Go to the PHET Static Electricity Simulation

https://phet.colorado.edu/sims/html/balloons-and-static-electricity/latest/balloons-and-static-electricity_en.html

Simulation #1: Yellow Balloon & Sweater

Choose the options from the menu at the bottom of the page

- Show all charges
- Remove Wall
- Yellow balloon only

Instructions

1. Grab the yellow balloon. Repeatedly stroke the yellow balloon across the entire sweater (10-20 times). Observe what happens.
2. Move the yellow balloon to the far right, away from the sweater. Let go of the balloon. Observe how the balloon moves.

A. Which type of static electricity was created when the balloon was stroked across the sweater?	
B. What charge did the sweater have before the balloon was stroked across it?	
C. What charge did the sweater have after the balloon was stroked across it?	

Electricity And Why It Moves Worksheet Answers

Steven Holzner

Electricity And Why It Moves Worksheet Answers:

Hands-On - Physical Science: Electricity and Magnetism Gr. 1-5 George Graybill, 2016-10-01 This is the chapter slice Electricity and Magnetism Gr 1 5 from the full lesson plan Hands On Physical Science Get your students excited about energy and all things that move with our Hands On Physical Science resource for grades 1 5 Combining Science Technology Engineering Art and Math this resource aligns to the STEAM initiatives and Next Generation Science Standards Study balanced and unbalanced forces by dropping different objects to measure the effect of gravity and air resistance on them Measure the distance of lightning by watching and listening for thunder Get into groups and make models of water sound and light waves Experience static electricity first hand by getting a balloon to magically stick to a wall Describe a solid liquid and gas around your home by its properties Make a compound machine with your classmates by combining at least two simple machines Each concept is paired with hands on experiments and comprehension activities to ensure your students are engaged and fully understand the concepts Reading passages graphic organizers before you read and assessment activities are included

Energy Around Us Gr. 4-7 Doug Sylvester, 1997-01-01 In this powerful unit students examine the very nature of energy its many forms and the changes it can undergo Students learn basic concepts and information as they go through a series of student notes The notes are followed by meaningful activities associated with the theme of each lesson To further captivate student interest many of these activities have been designed around the Science Challenge Format in which small groups of students work cooperatively to solve various problems Learning integrated with fun is the order of the day and your science class may never be as energetic This Physical Science lesson provides a teacher and student section with a variety of reading passages activities crossword word search and answer key to create a well rounded lesson plan

Taking Charge Larry E. Schafer, 1992 These teacher tested hands on activities use readily available materials and make students first exposure to electricity a fun one The unique historical approach of the first module introduces students to the ideas of Ben Franklin and other early explorers of electricity

Intro to Meteorology & Astronomy Parent Lesson Planner, 2014-09-09 Introduction to Meteorology and Astronomy Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Meteorology The Earth was created to be the dwelling place of man It is a complex world and its weather patterns affect our lives every day Whether you live near the equator a polar region or somewhere in between knowledge of the weather is important The Weather Book will teach you why our exact distance from the sun allows life on earth how the weather on the other side of the earth affects you how clouds form and how to identify the different types what the difference is between a cold and warm front why you can often see lightning long before you can hear thunder how to build your own weather station how to survive in dangerous weather what the greenhouse effect and the ozone hole are what Noah s flood and the Ice Age

have in common how weatherpersons forecast hurricanes and tornadoes how to read a weather map and what our responsibility is to the environment Learning about the weather is fun It will change the way you look at the clouds in the sky Now you ll have more of an understanding about what is going on miles above your head And when you hear a weather report on television you will understand so much more about the world around you Semester 2 Astronomy One thing we have in common with the ancients is that all of the human race has gazed at the night sky and the bright morning and wondered What s out there Our universe is so vast and awe inspiring that to learn about it is to learn about ourselves The Astronomy Book will teach you what long ago astronomers thought about other worlds solar system facts how constellations relate to astrology the history of space exploration black holes do they exist the origin and age of the moon why Mars doesn t support life the composition of stars supernova remnants and the myth of star birth asteroid legends and the extinction of the dinosaurs are there planets outside our solar system and could they be home to intelligent life what are UFOs and the age of comets and meteor showers Learning about the universe is huge fun In the almost infinite expanse above us we can examine planets galaxies and phenomena so beautiful and complex that we never outgrow a childlike wonder We see our own reflection in the moon the stars and in comet trails The more we learn the less we fear *Cambridge Primary Science Stage 6 Teacher's Resource Book with CD-ROM* Fiona Baxter,Liz Dilley,2014-05-22 Cambridge Primary Science is a flexible engaging course written specifically for the Cambridge Primary Science curriculum framework This Teacher s Resource for Stage 6 contains guidance on all components in the series Select activities and exercises to suit your teaching style and your learners abilities from the wide range of ideas presented Guidance includes suggestions for differentiation and assessment and supplementing your teaching with resources available online to help tailor your scheme of work according to your needs Answers to questions from the Learner s Book and Activity Book are also included The material is presented in editable format on CD ROM as well as in print to give you the opportunity to adapt it to your needs **Prentice Hall Science Explorer: Teacher's ed** ,2005 *Soft Circuits* Kylie Peppler,Melissa Gresalfi,Katie Salen Tekinbas,Rafi Santo,2014-10-10 Introducing students to the world of wearable technology Soft Circuits introduces students to the world of wearable technology Using Modkit an accessible DIY electronics toolkit students learn to create e textile cuffs electric tee shirts and solar powered backpacks Students also learn the importance of one component to the whole how for example changing the structure of LED connections immediately affects the number of LEDs that light up *Short Circuits* Kylie Peppler,Katie Salen Tekinbas,Melissa Gresalfi,Rafi Santo,2014-10-17 Tools and methods for creating electronic puppets Short Circuits offers students opportunities to undertake physical computing projects providing tools and methods for creating electronic puppets Students learn how to incorporate microprocessors into everyday materials and use them to enhance their language and writing skills with shadow puppet shows featuring their own DIY flashlights *Concepts of Mathematics & Physics Parent Lesson Plan* ,2013-08-01 Concepts of Mathematics and Physics Course Description This is the suggested course

sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility

Semester 1 Mathematics Numbers surround us Just try to make it through a day without using any It s impossible telephone numbers calendars volume settings shoe sizes speed limits weights street numbers microwave timers TV channels and the list goes on and on The many advancements and branches of mathematics were developed through the centuries as people encountered problems and relied upon math to solve them It s amazing how ten simple digits can be used in an endless number of ways to benefit man The development of these ten digits and their many uses is the fascinating story in Exploring the World of Mathematics Semester 2 Physics Physics is a branch of science that many people consider to be too complicated to understand John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students can comprehend Did you know that a feather and a lump of lead will fall at the same rate in a vacuum Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space Learn about the effects of inertia firsthand during fun and informative experiments Exploring the World of Physics is a great tool for students who want to have a deeper understanding of the important and interesting ways that physics affects our lives [Survey of](#)

[Science History & Concepts Parent Lesson Plan](#) ,2013-08-01 Survey of Science History Concepts Course Description Students will study four areas of science Scientific Mathematics Physics Biology and Chemistry Students will gain an appreciation for how each subject has affected our lives and for the people God revealed wisdom to as they sought to understand Creation Each content area is thoroughly explored giving students a good foundation in each discipline Semester 1 Math and Physics Numbers surround us Just try to make it through a day without using any It s impossible telephone numbers calendars volume settings shoe sizes speed limits weights street numbers microwave timers TV channels and the list goes on and on The many advancements and branches of mathematics were developed through the centuries as people encountered problems and relied upon math to solve them It s amazing how ten simple digits can be used in an endless number of ways to benefit man The development of these ten digits and their many uses is the fascinating story in Exploring the World of Mathematics Physics is a branch of science that many people consider to be too complicated to understand John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students can comprehend Did you know that a feather and a lump of lead will fall at the same rate in a vacuum Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space Learn about the effects of inertia first hand during fun and informative experiments Exploring the World of Physics is a great tool for student who want to have a deeper understanding of the important and interesting ways that physics affects our lives Semester 2 Biology and Chemistry The

field of biology focuses on living things from the smallest microscopic protozoa to the largest mammal In this book you will read and explore the life of plants insects spiders and other arachnids life in water reptiles birds and mammals highlighting God s amazing creation You will learn about biological classification how seeds spread around the world long term storage of energy how biologists learned how the stomach digested food the plant that gave George de Mestral the idea of Velcro and so much more For most of history biologists used the visible appearance of plants or animals to classify them They grouped plants or animals with similar looking features into families Starting in the 1990 s biologists have extracted DNA and RNA from cells as a guide to how plants or animals should be grouped Like visual structures these reveal the underlying design of creation Exploring the World of Biology is a fascinating look at life from the smallest proteins and spores to the complex life systems of humans and animals Chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought Without chemistry there would be nothing made of plastic there would be no rubber tires no tin cans no televisions no microwave ovens or something as simple as wax paper This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers Find out why pure gold is not used for jewelry or coins Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life See how people in the 1870s could jump over the top of the Washington Monument Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information
