

Electromagnetic Energy and Light

How does light travel? Do different colors of light travel at the same speed?

What?

Light is electromagnetic energy. The visible light spectrum is a tiny part of the electromagnetic spectrum. The visible spectrum of light is a rainbow of colors. When white light enters a prism, the different colors of light are refracted at different angles. This is because the speed of light is different for different colors of light. The speed of light is fastest for violet light and slowest for red light. This is why we see a rainbow of colors when white light enters a prism.

Model 1 - White Light

1. How does light travel? Do different colors of light travel at the same speed?
2. Why does light travel at the same speed?
3. Why are the colors of light different? Do different colors of light travel at different speeds?
4. Do all colors of light travel at the same speed?
5. Do all colors of light have the same energy? If no, what color has the highest energy and the lowest energy?

6. How does light travel? Do different colors of light travel at the same speed?
 - a. What color has the highest energy?
 - b. What color has the lowest energy?
 - c. Why is it important to know the energy of light?
