Latifi,2017-07-15 This volume presents a collection of peer reviewed scientific articles from the 14th International Conference on Information Technology New Generations held at the University of Nevada at Las Vegas on April 10 12 at Tuscany Suites Hotel in Las Vegas The Book of Chapters addresses critical areas of information technology including web technology communications computing architectures software engineering security and data mining *Correlations*

Between the Physical and Social Sciences Valentine J. Belfiglio,2011-12-16 This monograph presents four case studies that make correlations between the physical and social sciences The traditional empirical and postmodernist approaches to the study of the social sciences have left many scholars dissatisfied with the results of these methods The empiricists were on the right track but they did not go far enough It is important to anchor statistical data to mathematical formulae or the laws of physics in order to minimize the conscious or unconscious bias of some scholars who might otherwise manipulate data in support of preconceived notions Mathematical formulae and the laws of physics can take scholars further in deriving conclusions from sets of assumptions than can inferential statistics The use of inferential statistics in the social sciences is sufficiently regular that correlations from some mathematical formulae and physical laws prove valid **McGraw-Hills**
