Fall 2011 World History Semester Exam Review:

Documentary, World History, and National Power in the PRC Gotelind Mueller, 2013-10-30 Documentaries have recently become a favourite format for Chinese state directed media to present an officially sanctioned view of history. Indeed, this is not confined to Chinese national history. In stark contrast to the earlier self-centred preoccupation with Chinese history, there has been an upsurge in interest in foreign history with a view to illuminating China's role not only in world history but also on the global stage today and in the future. This book examines three recent Chinese documentary television series which present the officially sanctioned view of the rise of the modern West, the reasons for the end of the Soviet Union, and the legitimisation of the present-day Chinese government via a specific reading of modern Chinese history to argue for a Chinese rise in the future. With a focus on these documentaries, Gotelind Mueller discusses how history is presented on screen and explores the function of visual history for memory, culture, and wider society. Further, this book reveals how the presentation of Chinese and foreign history in a global framework impacts on the officially transmitted views on Self and Other and thus provides a keen insight into how the Chinese themselves regard their global rise. *Documentary World History and National Power in the PRC* will be welcomed by students and scholars working across a number of fields including Chinese studies, East Asian studies, media studies, television studies, history, and memory studies. **Russia in World History** Choi

Chatterjee, 2022-01-27 *Russia in World History* uses a comparative framework to understand Russian history in a global context. The book challenges the idea of Russia as an outlier of European civilization by examining select themes in modern Russian history alongside cases drawn from the British Empire. Choi Chatterjee analyzes the concepts of nation and empire, selfhood and subjectivity, socialism and capitalism, and revolution and the world order in the 19th, 20th, and 21st centuries. In doing so, she rethinks many historical narratives that bluntly posit a liberal West against a repressive authoritarian Russia. Instead, Chatterjee argues for a wider perspective which reveals that imperial practices relating to the appropriation of human and natural resources were shared across European empires both East and West. Incorporating the stories of famous thinkers such as Leo Tolstoy, Emma Goldman, Wangari Maathai, Arundhati Roy, among others, this unique interpretation of modern Russia is knitted together from the varied lives and experiences of those individuals who challenged the status quo and promoted a different way of thinking. This is a ground-breaking book with big and provocative ideas about the history of the modern world and will be vital reading for students of both modern Russian and world history. **5 Steps to a 5 AP**

From Martyrs to Murderers Robert L. Dahlgren,2017-04-13 In *From Martyrs to Murderers* the author explores the connections between the dark unflattering representations of public schools teachers and teaching in popular Hollywood films and the conservative attacks on public education that have culminated in a generation of neo liberal standards reform measures The author s analysis is based on a survey of 60 movies that feature significant interactions between public school teachers and their students This study employed a textual analysis method involving viewing the films alongside original script material which reveals that the narratives involving public schools during the late 20th century and early 21st century are distinct from those involving other types of schools or eras Rather than the romantic figures of earlier portraits such as Eve Arden s beloved Our Miss Brooks in the 1940s and 1950s radio and television serial these teachers are consistently portrayed as negative archetypes thus providing a rationale for the school reform agenda of the 1980s The sheer repetition of these damaging images in Hollywood products of the period made the American public more susceptible to the deceptive arguments outlined in *A Nation at Risk* the seminal 1983 report that provided the blueprint for the standards reform movement that has dominated education policy for the past generation This

work thus develops upon the critical perspectives of educational historians and social studies educators who have probed this turning point in the history of American schooling. It also offers an alternative means of viewing the reality of life in the nation's public institutions.

Teaching Transatlanticism Linda K Hughes, 2015-02-05 The 18 chapters in this book outline conceptual approaches to the field and provide practical resources for teaching ranging from ideas for individual class sessions to full syllabi and curricular frameworks.

Vietnam's Lost Revolution Geoffrey C. Stewart, 2017-03-24 Vietnam's Lost Revolution employs newly released archival material from Vietnam to examine the rise and fall of the Special Commissariat for Civic Action in the First Republic of Vietnam and in so doing reassesses the origins of the Vietnam War. A cornerstone of Ngô Đình Diệm's presidency, Civic Action was intended to transform Vietnam into a thriving modern independent noncommunist Southeast Asian nation. Geoffrey Stewart juxtaposes Diệm's revolutionary plan with the conflicting and competing visions of Vietnam's postcolonial future held by other indigenous groups. He shows how the government failed to gain legitimacy within the peasantry, ceding the advantage to the communist-led opposition and paving the way for the American military intervention in the mid 1960s. This book provides a richer and more nuanced analysis of the origins of the Vietnam War in which internal struggles over national identity, self-determination, and even modernity itself are central.

The Global History of Organic Farming Gregory A. Barton, 2018-02-02 Organic farming is a major global movement that is changing land use and consumer habits around the world. This book tells the untold story of how the organic farming movement nearly faltered after an initial flurry of scientific interest and popular support. Drawing on newly unearthed archives, Barton argues that organic farming first gained popularity in an imperial milieu before shifting to the left of the political spectrum after decolonization and served as a crucial middle stage of environmentalism. Modern organic protocols developed in British India under the guidance of Sir Albert Howard before spreading throughout parts of the British Empire, Europe, and the USA through the advocacy of his many followers and his second wife, Louise. Organic farming advocates before and during World War II challenged the industrialization of agriculture and its reliance on chemical

fertilizers They came tantalizingly close to influencing government policy The decolonization of the British Empire the success of industrial agriculture and the purging of holistic ideas from medicine side lined organic farming advocates who were viewed increasingly as cranks and kooks Organic farming advocates continued to spread their anti chemical farming message through a small community that deeply influenced Rachel Carson s ideas in *Silent Spring* a book that helped to legitimize anti chemical concerns The organic farming movement re entered the scientific mainstream in the 1980s only with the reluctant backing of government policy It has continued to grow in popularity ever since and explains why organic farming continues to inspire those who seek to align agriculture and health

Unequal Cities Maureen R. Benjamins,Fernando G. De Maio,2021-09-07 Across the United States Black people have shorter life expectancies than white people reflecting structural racism and deep rooted drivers of population health But are some cities more equal than others The elimination of racial and ethnic inequities differences that are avoidable unnecessary and unfair has been one of the overarching health related goals of the United States for decades Yet dramatic differences in health outcomes between Black people and white people persist rooted in structural and social determinants of health Nationally a Black baby can expect to live four years less than a white baby But mortality outcomes and inequities vary widely across cities In Washington DC for example the average life expectancy for Blacks is twelve years less than that of whites But in other cities mortality differences between races are less striking or nonexistent If health equity can be achieved in some cities why not all This is arguably the most important health equity issue of our time In *Unequal Cities* Maureen R Benjamins and Fernando G De Maio gather a team of experts to explore these racial inequities as well as the ten year gap in life expectancy between our healthiest and unhealthiest big cities Rigorous analyses give readers access to previously unavailable data on life expectancy mortality from leading causes of death and related Black white inequities for the country s 30 biggest cities The theoretically grounded essays also explore how characteristics of cities including their levels of income inequality and racial segregation impact overall health and Black white inequities The first book to specifically examine racial health inequities within and across US cities *Unequal Cities* offers a social justice framework for addressing the newly identified inequities as well as specific case studies to help public health advocates civic leaders and other stakeholders envision the steps needed to improve their cities current health outcomes and achieve racial equity A powerful call to action for health equity advocates and city leaders alike this book is essential reading Contributors David Ansell Darlene Oliver Hightower Jana Hirschtick

Mental Measurements Yearbook* Oscar Krisen Buros, 1978 Handbook of Alternative Theories of Economic Development Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28 The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged

period of time have existed as viable alternatives to today's mainstream and neo-classical tenets. With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields, this volume represents a landmark in the field of economic development. It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition. The subject matter is approached from several complementary perspectives. From a historical angle, the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment. From a geographical angle, it includes chapters on African, Chinese, Indian, and Muslim approaches to economic development. Different schools are also explored and discussed, including nineteenth-century US development theory, Marxist, Schumpeterian, Latin American structuralism, regulation theory, and world systems theories of development. In addition, the Handbook has chapters on important events and institutions, including The League of Nations, The Havana Charter, and UNCTAD, as well as on particularly influential development economists. Contemporary topics such as the role of finance, feminism, the agrarian issue, and ecology and the environment are also covered in depth. This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development. It should be read by all serious scholars, teachers, and students of development studies, and indeed anyone interested in alternatives to development orthodoxy.

Postwar Revisited Okwui Enwezor, Atreyee Gupta, 2025-03-28 Okwui Enwezor's 2016 exhibition *Postwar Art between the Pacific and the Atlantic 1945-1965* redefined the history of art produced in those two decades. Nearly a decade later, *Postwar Revisited* returns to these debates to present an image of a historical period in which Western conceptions of art, aesthetics, and philosophy are all thrown into intense flux after Auschwitz and Hiroshima, while the cultural energies of decolonization generate myriad artistic and intellectual practices across the globe which re-engage the connections of art to life itself. Focusing on modernist artists, artist collectives, and architects central to dissonant regional traditions, as well as influential exhibitions and patronage systems, the contributors produce a new understanding of emergent postwar global art. Provoking new ways of thinking, engaging and narrating art history, *Postwar Revisited* is essential reading for those interested in debates on global art history and global modernism, the intersections between art and decolonization, the cultural aspects of the Cold War, and the Non-Aligned Movement and modern and contemporary art more generally.
