

A 3D rendering of a white puzzle with one central piece missing. The missing piece is a vibrant blue color and features the text "PUT IT ALL TOGETHER!" in bold, white, 3D block letters. The puzzle pieces are arranged in a grid-like pattern, with the blue piece being the only one of its color. The lighting creates soft shadows, giving the puzzle a three-dimensional appearance.

Quest: V. Virom Coppola, 2004-03-16 The task before us in a nutshell my fellow humans is the clear and present danger of finding out who we really are That is the impossible feat I have given this poor creature V Virom and each of us with him The proof of the pasta is always in the tasting So says the author at the beginning of his book as he invites the reader on a detective story offering a beautifully written book with a rather remarkable synthesis of modern thinking one that builds from the ground of existence alone to a spirituality both secular and sacred That single paragraph on the cover of the book says what needs to be said it seems to me When I thought about this further and longer requested description of the book for the web site T S Eliot came to mind I am referring to the time when he was asked what his poem Prufrock was about and kindly replied Read the poem I do think he made a valid point because asking for a description of a book is the same when you think about it Shouldnt a person rather be reading the book itself At the same time I certainly can understand a person wanting to get a feel for the book before purchasing it and since you dont have the book to handle and page through to do that which I myself always do to see if there is going to be a love affair between the book and me I will give the viewer some of the Overture at the beginning of my book as an overture here as well hopefully to help accomplish the tangential absence Call it virtual foreplay if you want First Review From the Free Venice Beachhead News June 2004 Book Review QUEST A SEARCH FOR A SOUL MODERNKIND by Vincent Coppola Reviewed by Steve Goldman a former editor for Encyclopedia Britannica With great passion yet without a scintilla of mawkish sentimentality Coppola here makes the strong compelling case for love as the direct and primary implication of human consciousness That would be laudable by itself but these are not merely the pleasant musings of a decent well intentioned person This is and it is astounding tightly reasoned philosophy based on acute astute observation and profound and powerful argument Building on Descartes whom he explicitly reverses on the fundamental matter of proof of personal experience and Kant who seems indispensable to all who came after Coppola emerges with a distinctive and compassionate American existentialism that is unlike anything heretofore With strongly grounded links to modern cosmology evolutionary theory and sheer phenomenology of consciousness in space time Coppola delivers a ringing statement of free will so sorely needed in this era of burgeoning biological reductionist determinism This in turn yields a ringing adduction of the ontological primacy of self with commensurately devastating attacks on any variety of teeny bopping reductionism chemical biological physical or psychological and as well on any religio philosophical tradition usually Asian which explicitly denies or tries to eradicate the self I myself exist and I can love is the rigorously derived powerfully demonstrated theorem which is the first principal here What is more the revolutionary optional theology Quest proposes seems to at last settle that huge and perennial question for contemporary times Additionally and astonishingly and with philosophical deftness and gracious style Coppolas secular Christology evinces sacred humanitarian values again so needed in this era Coppola is a highly trained professional philosopher a prodigiously well read and deeply thoughtful

theorist and analyst whose similarity to the preponderant mentality in his field is only superficial That is because Vincent V Virom is a philosopher in the all but abandoned grand tr
