Probabilistic Metric Spaces B. Schweizer,A. Sklar,2011-11-30 This distinctly nonclassical treatment focuses on developing aspects that differ from the theory of ordinary metric spaces working directly with probability distribution functions rather than random variables The two part treatment begins with an overview that discusses the theory s historical evolution followed by a development of related mathematical machinery The presentation defines all needed concepts states all necessary results and provides relevant proofs The second part opens with definitions of probabilistic metric spaces and proceeds to examinations of special classes of probabilistic metric spaces topologies and several related structures such as probabilistic normed and inner product spaces Throughout the authors focus on developing aspects that differ from the theory of ordinary metric spaces rather than simply transferring known metric space results to a more general setting

Almost Periodic Functions Harald Bohr,2018-08-15 Starting with a discussion of periodic functions this groundbreaking exposition advances to the almost periodic case An appendix covers the almost periodic functions of a complex variable 1947 edition

General Topology John L. Kelley,2017-03-17 The clarity of the author s thought and the carefulness of his exposition make reading this book a pleasure noted the Bulletin of the American Mathematical Society upon the 1955 publication of John L Kelley s General Topology This comprehensive treatment for beginning graduate level students immediately found a significant audience and it remains a highly worthwhile and relevant book for students of topology and for professionals in many areas A systematic exposition of the part of general topology that has proven useful in several branches of mathematics this volume is especially intended as background for modern analysis An extensive preliminary chapter presents mathematical foundations for the main text Subsequent chapters explore topological spaces the Moore Smith convergence product and quotient spaces embedding and metrization and compact uniform and function spaces Each chapter concludes with an abundance of problems which form integral parts of the discussion as well as reinforcements and counter examples that mark the boundaries of possible theorems The book concludes with an extensive index that provides supplementary material on elementary set theory

Atomic Physics Max Born,Roger John Blin-Stoyle,J. M. Radcliffe,1989-06-01 Nobel Laureate s lucid treatment of kinetic theory of gases elementary particles nuclear atom wave corpuscles atomic structure and spectral lines much more Over 40 appendices bibliography

The Summation of Series Harold T. Davis,2015-02-18 Valuable as text and a reference this concise monograph covers calculus of finite differences gamma and psi functions other methods of summation summation of tables and infinite sums 1962 edition

Commutative Algebra, Volume II Oscar Zariski,Pierre Samuel,2019-11-13 The second text in this two book series extends the classical material of Volume I which focuses on field theory and the ideal theory of Noetherian rings and Dedekind domains The connection of Volume II s material to algebraic geometry is stressed throughout the presentation making this book a practical introduction to some basic concepts and the arithmetical foundations of algebraic geometry The opening chapter

deals with properties of places and is followed by a chapter that explores the classical properties of polynomial and power series rings and their applications to algebraic geometry The final chapter examines the theory of local rings which provides the algebraic basis for the local study of algebraic and analytical varieties Several helpful Appendixes conclude the text

The Direction of Time Hans Reichenbach, Maria Reichenbach, 1999-07-02 Distinguished physicist examines emotive significance of time time order of mechanics time direction of thermodynamics and microstatistics time direction of macrostatistics and time of quantum physics Analytic methods of scientific philosophy in investigation of probability quantum mechanics theory of relativity causality 1971 edition

Mathematics for Operations Research W. H. Marlow, 1993-01-01 Practical and applications oriented this text explains effective procedures for performing mathematical tasks that arise in many fields including operations research engineering systems sciences statistics and economics Most of the examples and many of the 1 300 problems illustrate techniques and nearly all of the tables display reference material for procedures 1978 edition

Strength of Materials J. P. Den Hartog, 2012-06-28 In addition to coverage of customary elementary subjects tension torsion bending etc this introductory text features advanced material on engineering methods and applications plus 350 problems and answers 1949 edition

Vector and Tensor Analysis Louis Brand, 2020-04-15 An outstanding introduction to tensor analysis for physics and engineering students this text admirably covers the expected topics in a careful step by step manor In addition to the standard vector analysis of Gibbs including dyadic or tensors of valence two the treatment also supplies an introduction to the algebra of motors The entire theory is illustrated by many significant applications Surface geometry and hydrodynamics are treated at length in separate chapters Nearly all of the important results are formulated as theorems in which the essential conditions are explicitly stated Each chapter concludes with a selection of problems that develop students technical skills and introduce new and important applications The material may be adapted for short courses in either vector analysis or tensor analysis
