and corrosion resistance and being environmentally friendly Using the preparation methods for epoxy based composite they can easily be formed into complex shapes or structures Intended for researchers investigating geopolymers and their matrix composite materials this book is also a valuable resource for engineers from various fields such as materials mechanical civil and structural engineering as well as students interested in other kinds of inorganic materials or even cementitious materials in general *Geopolymer, Green Chemistry and Sustainable Development Solutions* Joseph Davidovits, 2005

They Built the Pyramids Joseph Davidovits, 2008-05-20 Joseph Davidovits explains the intriguing theory that made him famous He shows how the Pyramids were built by using re agglomerated stone a natural limestone treated like a concrete and not with huge carved blocks hauled on fragile ramps Archaeology bears him out as well as hieroglyphic texts scientific analysis religious and historical facts The author sweeps aside the conventional image which cripples Egyptology and delivers a captivating and surprising view of this civilisation the first complete presentation on how the pyramids were built The revelations are sensational especially when he explains why the pharaohs stopped building great pyramids because of an over exploitation of raw materials and a likely environmental disaster He charts the rise of this technology its apogee at Giza and the decline Everything is logical everything fits into place *Ancient Geopolymers in South America and Easter Island* Joseph Davidovits, 2024-11-16 This book presents the study on Ancient Geopolymers in South America and Easter Island regions exploring the artificial nature of the volcanic rocks used in the construction of Easter Island s statues Contrary to the belief that the statues were carved and transported Davidovits suggests they were made on site using geopolymer technology He proposes that this knowledge came from Amerindians from the Andes specifically the Tiahuanaco region near Lake Titicaca The book is divided into two parts the first examines geopolymeric artificial stone technologies in the Andes and the second establishes a connection between these technologies and Easter Island 3 700 km away Davidovits research includes geological expeditions SEM analysis petrography and a comprehensive review of international literature It is intriguing to observe that in both cases Pumapunku Tiwanaku in the Andes and Easter Island volcanic rocks are involved which contain biological carbon These discoveries undeniably support the theory of geopolymeric artificial manufacturing challenging traditional archaeological views *International RILEM Conference on Synergising Expertise towards Sustainability and Robustness of Cement-based Materials and Concrete Structures* Agnieszka Jędrzejewska, Fragkoulis Kanavaris, Miguel Azenha, Farid Benboudjema, Dirk Schlicke, 2023-06-08 This book highlights the latest advances innovations and applications in cement based materials CBM and concrete structures as presented by leading international researchers and engineers at the International RILEM Conference on synergizing expertise toward sustainability and robustness of CBM and concrete structures SynerCrete held in Milos Island Greece on June 14 16 2023 The aim of the conference was to discuss and arouse progress in research development and application of CBM and structural concrete through combination of expertise from distinct fields of knowledge such as performance based design 3D modeling for analysis design building information

modeling and even robotics while keeping focus on multiscale approaches at time and spatial levels It covers a diverse range of topics concerning alternative concrete formulations for adaptation to climate change performance based and multiphysics multiscale design and innovative testing structural health monitoring and maintenance management integral BIM based planning and resource responsible building The contributions which were selected by means of a rigorous international peer review process present a wealth of exciting ideas that will open novel research directions and foster new multidisciplinary collaborations The two volumes encompass more than 200 original contributions in the field
