Globalizing Knowledge Intellectuals Universities And Publics In Transformation:

Globalizing Knowledge Michael D. Kennedy, 2014-12-10 Heralding a push for higher education to adopt a more global perspective the term globalizing knowledge is today a popular catchphrase among academics and their circles The complications and consequences of this desire for greater worldliness however are rarely considered critically In this groundbreaking cultural political sociology of knowledge and change Michael D Kennedy rearticulates questions approaches and case studies to clarify intellectuals and institutions responsibilities in a world defined by transformation and crisis Globalizing Knowledge introduces the stakes of globalizing knowledge before examining how intellectuals and their institutions and networks shape and are shaped by globalization and world historical events from 2001 through the uprisings of 2011 13 But Kennedy is not only concerned with elaborating how wisdom is maintained and transmitted he also asks how we can recognize both interconnectedness and inequalities and possibilities for more knowledgeable change within and beyond academic circles Subsequent chapters are devoted to issues of public engagement the importance of recognizing difference and the local s implication in the global and the specific ways in which knowledge images and symbols are shared globally Kennedy considers numerous case studies from historical happenings in Poland Kosova Ukraine and Afghanistan to today s energy crisis Pussy Riot the Occupy Movement and beyond to illuminate how knowledge functions and might be used to affect good in the world *Alfred Schutz, Phenomenology, and the Renewal of Interpretive Social Science* Besnik

Pula, 2024-04-16 In recent decades the historical social sciences have moved away from deterministic perspectives and increasingly embraced the interpretive analysis of historical process and social and political change This shift has enriched the field but also led to a deadlock regarding the meaning and status of subjective knowledge Cultural interpretivists struggle to incorporate subjective experience and the body into their understanding of social reality In the early twentieth century philosopher Alfred Schutz grappled with this very issue Drawing on Edmund Husserl s phenomenology and Max Weber s historical sociology Schutz pioneered the interpretive analysis of social life from an embodied perspective However the recent interpretivist turn influenced by linguistic philosophies discourse theory and poststructuralism has overlooked the insights of Schutz and other phenomenologists This book revisits Schutz s phenomenology and social theory positioning them against contemporary problems in social theory and interpretive social science research The book extends Schutz s key concepts of relevance symbol relations theory of language and lifeworld meaning structures It outlines Schutz s critical approach to the social distribution of knowledge and develops his nascent sociology and political economy of knowledge This book will appeal to readers with interests in social theory phenomenology and the methods of interpretive social science including historical sociology cultural sociology science and technology studies political economy and international relations

Intellectuals, Inequalities and Transitions, 2019-11-26 This volume is devoted to the central themes in Iv n Szel nyi s sociological oeuvre comprising of empirical explorations and their theoretical refinement in the last 50 years The

contributors have been asked to take interpretive and critical stances on his work and to clarify the relevance of his insights Iv n Szel nyi has been asked to write a concluding chapter and respond to the present reflections on his work The ensuing volume discusses Szel nyi s captivating scholarship as being grounded in a complex program for the political economy of socialisms and post socialist capitalisms and introduces him as a neoclassical sociologist whose research projects continue to investigate inequalities created by the interaction of markets and redistributive structures in various societies Contributors include Dorothee Bohle Tam s Demeter Gil Eyal B la Greskovits Michael D Kennedy Tam s Kolosi Karmo Kroos Victor Nee David Ost Iv n Szel nyi and Bruce Western

The Impact Agenda Katherine E. Smith,Justyna Bandola-Gill,Nasar Meer,Ellen Stewart,Richard Watermeyer,2020-05-13 Measuring research impact and engagement is a much debated topic in the UK and internationally This book is the first to provide a critical review of the research impact agenda situating it within international efforts to improve research utilisation Using empirical data it discusses research impact tools and processes for key groups such as academics research funders knowledge brokers and research users and considers the challenges and consequences of incentivising and rewarding particular articulations of research impact It draws on wide ranging qualitative data combined with theories about the science policy interplay and audit regimes to suggest ways to improve research impact

Competitive Accountability in Academic Life Richard Watermeyer,2019 This book considers how a culture of competitive accountability in UK higher education produces multiple tensions contradictions and paradoxes that are destabilizing and deleterious to the work and identities of academics as research scientists It suggests the potential of a new discourse of scientific accountability that frees scientists and their public communities from the absurdities and profligacy of performativity and managerial governmentality encountered in the REF and an impact agenda the noose of competitive accountability and a more honest and meaningful public contract

The Risk of Compressed Modernity Chang Kyung-Sup,2025-07-11 In many Asian societies the process of modernization often took place in a rapid and highly compressed fashion not over centuries as had happened in most Western societies but in several decades This enabled Asian societies to achieve high levels of economic growth very quickly but it also harbored unexpected risks and costs that threatened further development The very mechanisms and strategies that made their explosive modernization possible tended to produce existentially hazardous consequences in virtually all areas of public and private life and seemingly insurmountable obstacles to sustained advances in the future Focusing on South Korea and other Asian countries this book presents a critical account of compressed modernity and its key structural risks These include endemic political crises distorted industrial governance widespread labor displacement worsening intellectual and cultural dependency rampant environmental and physical hazards and even abrupt demographic meltdown However these risks and contradictions have also stimulated structural reforms and adaptations opening up the possibility for the kind of radical change that Ulrich Beck described as the metamorphosis of the world

Renewing the Church by the Spirit Amos Yong,2020-11-03 In most parts

of the world and especially where Christianity is flourishing Pentecostal and charismatic movements predominate What would it look like for the Western world beset by the narrative of decline to participate in this global Spirit driven movement According to Amos Yong it all needs to start with the way we approach theological education Renewing the Church by the Spirit makes the case for elevating pneumatology in Christian life allowing the Spirit to reinvigorate church and mission Yong shows how this approach would attend to both the rapidly deinstitutionalizing forms of twenty first century Christianity and the pressing need for authentic spiritual experiences that marks contemporary religious life He begins with a broad assessment of our postmodern post Enlightenment post Christendom ecclesial context before moving into a detailed outline of how a Spirit filled approach to theological education its curriculum pedagogy and scholarship can meet the ecclesial and missional demands of this new age

Knowledge Socialism Michael A. Peters, Tina Besley, Petar Jandrić, Xudong Zhu, 2020-10-07 This is the first collection focusing on knowledge socialism a particularly apt term used to describe a Chinese socialist mode of production and socialist approach to development and modernity based around the rise of peer production new forms of collaboration and collective intelligence Making the case for knowledge socialism the book is intended for students teacher scholars and policy theorists in the field of knowledge economy

Language and the Knowledge Economy Josep Soler, Kathrin Kaufhold, 2025-02-28 This volume offers a holistic understanding of the interconnections of language specifically English scholarly publishing and knowledge production and circulation through a sociolinguistic lens in contemporary academia across different European settings for research purposes The volume is organised around three parts the first part explores individual factors underpinning knowledge production and their role in shaping scholars academic careers the second part critically reflects on the challenges and opportunities for multilingual scholars in the academic landscape examining the inherent tensions in the interactions between English and other languages the final part considers the ways in which academic knowledge is institutionalised at universities private companies and on a national scale and the subsequent impact on knowledge dissemination Taken together the chapters provide a coherent and holistic overview of the affordances and limitations that different social actors experience when participating in such cycles including the different modes of access to resources across geographic contexts and disciplinary traditions An important contribution of the volume is the multilayered angle that it incorporates into analysing issues of scholarly publishing in today's academia placing language as a social practice at the heart of the structuring processes that condition the creation dissemination and consumption of knowledge in contemporary societies This book will be of interest to scholars in English for research and publication purposes sociolinguistics language and education and applied linguistics

Capital of Mind Adam R. Nelson, 2024-01-02 In the second volume of his planned trilogy that will recast the history of the university in a fresh and surprising light Adam R Nelson aims to show how knowledge which had been commodified starting in the late eighteenth century became industrialized in the nineteenth century Nelson explains how the idea of the modern university arose from a

set of institutional and ideological reforms designed to foster the mass production and mass consumption of knowledge that is the industrialization of ideas Fusing the history of higher education with the history of capitalism Nelson suggests that this marketization of knowledge propelled the institutionalization of the university far earlier than previously understood
