WARNING

Cut Hazard

Handle blades carefully.

Failure to do so can result in cuts.

Before First Use

Before using your Food Processor for the first time, wash the work bowl, work bowl cover, mini bowl, feed tube pusher, discs, and blades either by hand or in the dishwasher (see "Cleaning the Food Processor" on page 12).

Work Bowl Assembly

1. Place the Food Processor base on a dry, level countertop with the controls facing forward. Do not plug in the unit until it is completely assembled.
2. With the handle just to the left of center, place the work bowl on the base, fitting the center opening over the power shaft.
3. Grasp the work bowl handle and turn the bowl to the right until it locks into position.

4. Insert the desired accessory into the work bowl. See the next page for accessory instructions.
5. Place the work bowl cover on the work bowl with the feed tube just to the left of the work bowl handle. Grasp the feed tube and turn the cover to the right until it locks into place.

NOTE: Do not attach the cover to the work bowl before the work bowl is locked on the base. Damage to the work bowl may result.

6. Fit the food pusher into the feed tube.

7. Plug the power cord into an electrical outlet.

NOTE: Your Food Processor will not operate unless the work bowl and work bowl cover are properly locked on the base.

Do not remove the work bowl from the base without first removing the work bowl cover. Damage to the work bowl may result.

J. Baker, 2013-08-27 Food manufacturing has evolved over the centuries from kitchen industries to modern sophisticated production operations A typical food factory includes the food processing and packaging lines the buildings and exterior landscaping and the utility supply and waste treatment facilities As a single individual is unlikely to possess all the necessary skills required to facilitate the design the task will undoubtedly be undertaken by an interdisciplinary team employing a holistic approach based on a knowledge of the natural and biological sciences most engineering disciplines and relevant legislation In addition every successful project requires a competent project manager to ensure that all tasks are completed on time and within budget This Handbook attempts to compress comprehensive up to date coverage of these areas into a single volume It is hoped that it will prove to be of value across the food manufacturing community The multi disciplinary nature of the subject matter should facilitate more informed communication between individual specialists on the team It should also provide useful background information on food factory design for a wider range of professionals with a more peripheral interest in the subject for example process plant suppliers contractors HSE specialists retailers consultants and financial institutions Finally it is hoped that it will also prove to be a valuable reference for students and instructors in the areas of food technology chemical engineering and mechanical engineering in particular **BREAD WITHOUT BORDERS: WHEAT-FREE**

Handbook on the Geographies of Power Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the

book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war
