local culture and attitudes toward education Lofty discovered how the island time values that previously informed students literacy learning have been transformed by outside influences including technology social media and the influx of new residents from urban areas Building on the ethnographic findings of the original study the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication and those of school based literacy Lofty examines the new literacies now essential for students in a technologically connected world both those who aspire to continue the traditional island work of lobster fishing and for the many who now choose to pursue other careers and attend college on the mainland

*Psychology and Mathematics Education* Gila Hanna,Laura Macchi,Karin Binder,Laura Martignon,Katharina Loibl,2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality

rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity *Resources in Education* ,1997 *JEBPS Vol 12-N2* Journal of Evidence-Based Practices for Schools,2011-09-01 The Journal of Evidence Based Practices for Schools is a leader in publishing research to practice articles for educators and school psychologists The mission of this journal is to positively influence the daily practice of school based professionals through studies demonstrating successful research based practices in educational settings As a result the editors are committed to publishing articles with an eye toward improving student performance and outcomes by advancing psychological and educational practices in the schools They seek articles using non technical language that 1 outline an evidence based practice 2 describe the literature supporting the effectiveness and theoretical underpinnings of the practice 3 describe the findings of a study in which the practice was implemented in an educational setting and 4 provide readers with information they need to implement the practice in their own schools in a section entitled Implementation Guidelines The Journal of Evidence Based Practices for Schools differs from other scholarly journals in that it features articles that demonstrate empirically based procedures for readers to apply the practice in their setting **Handbook for Counselors Serving Students With Gifts and Talents** Tracy L. Cross,Jennifer Riedl Cross,2021-09-30 The second edition of Handbook for Counselors Serving Students With Gifts and Talents provides the definitive overview of research on the general knowledge that has been amassed regarding the psychology of gifted students This book Introduces the reader to the varied conceptions of giftedness Covers issues specific to gifted children and various intervention methods Describes programs designed to fulfill the need these children have for challenge Is updated and expanded addressing contemporary issues Reflects the latest research on giftedness With chapters authored by leading experts in the field Handbook for Counselors Serving Students With Gifts and Talents is a resource professionals can turn to for answers to a wide variety of questions about gifted children *Democratic Dilemmas* Julie A. Marsh,2012-02-01 Drawing on three years of field research and extensive theoretical and empirical literature *Democratic Dilemmas* chronicles the day to day efforts of educators and laypersons working together to advance student learning in two California school districts Julie A Marsh reveals how power values organizational climates and trust played key roles in these two districts achieving vastly different results In one district parents citizens teachers and administrators effectively developed and implemented districtwide improvement strategies in the other community and district leaders unsuccessfully attempted to improve systemwide accountability through dialogue The book highlights the inherent tensions of deliberative democracy competing notions of representation limitations of current conceptions of educational accountability and the foundational importance of trust to democracy and education reform It further provides a framework for improving community educator collaboration and lessons for policy and practice
