100 Marks (P1)

QUESTION 10 (Start on a new page)

- 10.1 The circuit below consists of a 4 Ω and 16 Ω resistor connected in parallel and an unknown resistor R_x in series. An ammeter, a high-resistance voltmeter, a closed switch and battery are connected, as shown. The resistance of the battery and wires can be ignored.

The total power dissipated in the parallel part of the circuit is 32 W.

- 10.1.1 Define the term power. (2)
10.1.2 Calculate the effective resistance of the parallel combination. (2)
10.1.3 Calculate the potential difference across the resistors in parallel. (2)
10.1.4 Calculate the current through resistor R_x. (2)

The switch in the circuit is now OPENED.

- 10.1.5 How will the reading on the voltmeter (V) be affected? Choose from INCREASE, DECREASE or REMAIN THE SAME. (1)
10.1.6 Refer the answer to QUESTION 10.1.5. (2)

- 10.2 A geyser, labeled 2000 W, is used for an average of 5 hours per day. The cost of electricity is 30 cents per kWh.

- 10.2.1 Calculate the energy used by the geyser for 5 hours per day. (2)
10.2.2 Calculate the cost of electricity to operate the geyser for a month with 30 days. (2)

Grade 11 November 2014 Electrical Technology:

Rare Metal Technology 2014 Neale R. Neelameggham, Shafiq Alam, Harald Oosterhof, Animesh Jha, Shijie Wang, 2014-02-03 This collection presents the papers presented in the symposium on extraction of rare metals as well as rare extraction processing techniques used in metal production Paper topics include the extraction and processing of elements like antimony arsenic calcium chromium hafnium gold indium lithium molybdenum niobium rare earth metals rhenium scandium selenium silver strontium tantalum tellurium tin tungsten vanadium and zirconium Rare processing techniques presented include bio leaching molecular recognition technology recovery of valuable components of commodity metals such as magnesium from laterite process wastes titanium from ilmenites and rare metals from wastes such as phosphors and LCD monitors

Surface Engineering R.S. Walia, Qasim Murtaza, Shailesh Mani Pandey, Ankit Tyagi, 2022-12-19 Surface engineering is considered an important aspect in the reduction of friction and wear This reference text discusses a wide range of surface engineering technologies along with applications in a comprehensive manner The book describes various methods in surface engineering technology with a thorough explanation of various aspects of each process that comes under this domain Apart from an enhanced explanation of the process and its attributes this book also gives insight into the types of materials applications and optimization of surface engineering techniques It discusses important topics including surface engineering of the functionality of graded materials materials characterization processing of biomaterials design surface modification technologies and process control smart manufacturing artificial intelligence and machine learning applications The book discusses computational and simulation analyses for better selection of process parameters covers optimizations of processes with state of the art technologies discusses applications of surface engineering in medical agricultural architecture engineering and allied sectors covers processing techniques of biomaterials in surface engineering The text is useful for senior undergraduate graduate students and academic researchers working in diverse areas such as industrial and production engineering mechanical engineering materials science and manufacturing science It covers a hybrid process for surface modification modeling techniques and issues in surface engineering

2nd International Conference on Wireless Intelligent and Distributed Environment for Communication Isaac Woungang, Sanjay Kumar Dhurandher, 2019-03-27 This book presents the proceedings of the International Conference on Wireless Intelligent and Distributed Environment for Communication WIDECOM 2019 sponsored by the University of Milan Milan Italy February 11 13 2019 The conference deals both with the important core and the specialized issues in the areas of new dependability paradigms design and performance of dependable network computing and mobile systems as well as issues related to the security of these systems The WIDECOM proceedings features papers addressing issues related to the design analysis and implementation of infrastructures systems architectures algorithms and protocols that deal with network computing mobile ubiquitous systems cloud systems and IoT systems It is a valuable reference for researchers instructors students scientists

engineers managers and industry practitioners The book s structure and content is organized in such a manner that makes it useful at a variety of learning levels Presents the proceedings of the International Conference on Wireless Intelligent and Distributed Environment for Communication WIDECOM 2019 Milan Italy February 11 13 2019 Includes an array of topics networking computing mobile ubiquitous systems cloud systems and IoT systems Addresses issues related to protecting information security and establishing trust in the digital space Advanced Machining and Micromachining Processes

Sandip Kumar,Norfazillah Binti Talib,Gurudas Mandal,2025-04-08 This book offers a comprehensive overview of the fundamentals principles and latest innovations in advanced machine and micromachining processes Businesses are continually seeking innovative advanced machining and micromachining techniques that optimize efficiency while reducing environmental harm This growing competitive pressure has spurred the development of sophisticated design and production concepts Modern machining and micromachining methods have evolved to accommodate the use of newer materials across diverse applications while ensuring precise machining accuracy The primary aim of this book is to explore and analyze various approaches in modern machining and micromachining processes with a focus on their effectiveness and application in successful product development Consequently the book emphasizes an industrial engineering perspective This book covers a range of advanced machining and micromachining processes that can be utilized by the manufacturing industry to enhance productivity and contribute to socioeconomic development Additionally it highlights ongoing research projects in the field and provides insights into the latest advancements in advanced machining and micromachining techniques The 31 chapters in the book cover the following subjects abrasive jet machining water jet machining principles of electro discharge machining wire electro discharge machining laser beam machining plasma arc machining ion beam machining electrochemical machining ultrasonic machining electron beam machining electrochemical grinding photochemical machining process abrasive assisted micromachining abrasive water jet micromachining electro discharge machining electrochemical micromachining ultrasonic micromachining laser surface modification techniques ion beam processes glass workpiece micromachining using electrochemical discharge machining abrasive water jet machining ultrasonic vibration assisted micromachining laser micromachining s role in improving tool wear resistance stress and surface roughness in high strength alloys abrasive flow finishing process elastic emission machining magnetic abrasive finishing process genetic algorithm for multi objective optimization in machining machining of Titanium Grade 2 and P 20 tool steel and wet bulk micromachining in MEMS fabrication Audience The book is intended for a wide audience including mechanical manufacturing biomedical and industrial engineers and R D researchers involved in advanced machining and micromachining technology **Sustainable Production Technology in Food** Jose M. Lorenzo,Paulo E.S. Munekata,Francisco J. Barba,2021-08-06 Sustainability is an essential part of our modern food production system Carrying out food research that considers environmental social and economic factors is a major objective for food producers and researchers Strategic development and use of technology can

greatly assist in the progression toward a more sustainable food system Sustainable Production Technology in Food explores important scientific and practical aspects related to sustainable technologies used in all aspects of the food system This book is organized into 13 chapters that cover the main concepts related to sustainability and technology Coverage includes current technology in the industry technological developments to improve sustainability of food production biopreservation pulsed electric fields high pressure processing ultrasound cold plasma and nanotechnology regulatory aspects and future perspectives Presents a comprehensive discussion around the technological advances of sustainable food production Addresses the current relationship between food production and sustainability Focuses on how technology can impact the sustainability of the food production system

Proceedings of the 2014 Energy Materials Conference The Minerals, Metals & Materials Society (TMS), 2015-04-06 This DVD contains a collection of papers presented at EnergyMaterials 2014 a conference organized jointly by The Chinese Society for Metals CSM and The Minerals Metals Materials Society TMS and held November 4 6 2014 in Xi an Shaanxi Province China With the rapid growth of the world s energy production and consumption the important role of energy materials has achieved worldwide acknowledgement Material producers and consumers constantly seek the possibility of increasing strength improving fabrication and service performance simplifying processes and reducing costs Energy Materials 2014 has provided a forum for academics researchers and engineers around the world to exchange state of the art development and information on issues related to energy materials The papers on the DVD are organized around the following topics Materials for Coal Based Systems Materials for Gas Turbine Systems Materials for Nuclear Systems Materials for Oil and Gas Materials for Pressure Vessels

Power and Energy Richard Kong, 2015-05-06 Power and Energy contains 86 selected papers from the International Conference on Power and Energy CPE 2014 Shanghai China 29 30 November 2014 and presents a wide range of topics Energy management planning and policy making Energy technologies and environment Energy prospects Conventional and renewable power generation Power system man

Information and Communications Technology in STEM Education Umesh Ramnarain, Mdutshekelwa Ndlovu, 2023-07-21 This timely book presents the latest scholarly research on the integration of Information Communications Technology ICT for enhanced STEM education in African schools and universities Featuring critical discussion and illustration of key data led arguments this volume gives a comprehensive picture of the breadth complexity and diversity of issues present in different African countries It highlights a diverse range of topics such as approaches to ICT integration the use of digital technologies to support inquiry based learning teacher development and contextual issues in ICT integration for STEM education Chapters feature contributions and shared experiences from prominent science educators and researchers from across African regions and demonstrate findings and reflections on emerging trends pedagogical innovations and research informed practices on ICT integration in STEM education Offering cutting edge research on STEM and digital education in Africa the book will appeal to researchers postgraduate students and scholars in the fields of STEM education ICT education digital education
