**Active Reading****Section: How Populations Change in Size**

Read the passage below and answer the questions that follow.

Over time, the growth rates of populations change because birth rates and death rates increase or decrease. Growth rates can be positive, negative, or zero. For a population's growth rate to be zero, the average number of births must equal the average number of deaths. A population would remain the same size if each pair of adults produced exactly two offspring, and each of those offspring survived to reproduce. If the adults in a population are not replaced by new births, the growth rate will be negative and the population will shrink.

**IDENTIFYING MAIN IDEAS**

One reading skill is the ability to identify the main idea of a passage. The main idea is the main focus or key idea. Frequently, a main idea is accompanied by supporting information that offers detailed facts about main ideas.

In the space provided, write the letter of the term or phrase that best matches the description.

**Reproductive Technologies and Biobanking for the Conservation of Amphibians** Aimee J. Silla, Andy J. Kouba, Harold Heatwole, 2022-10-03

How to decelerate loss of global biodiversity is one of the greatest challenges of our generation. Reproductive technologies have enormous potential to assist the recovery of species by enhancing reproductive output, facilitating genetic management and supporting reintroduction of threatened species. Of particular value are cryopreservation technologies coupled with the establishment of global gene banks to conserve in perpetuity the remaining extant genetic diversity of threatened amphibians. *Reproductive Technologies and Biobanking for the Conservation of Amphibians* brings together leading experts in the field to provide a comprehensive overview of current best practices, summarise technological advancements and present a framework for facilitating the integration of reproductive technologies and biobanking into conservation breeding programs for threatened amphibians. It is an invaluable reference for the next generation of conservation practitioners, captive breeding facilities, researchers and policy makers involved with biodiversity conservation.
