Enhance Learning in Higher Education Stylianos Hatzipanagos, Rebecca Rochon, 2014-10-10 This book addresses the need to diversify mainstream forms of assessment currently used in Higher Education in order to re establish the focus on the learning process Making assessment central to student learning is about returning to what current research emphasises the primary beneficiary of assessment should be the student To achieve this in the assessment context students and tutors must engage in a process of dialogue and feedback It seems to be widely accepted that assessment succeeds when the learner monitors identifies and then is able to bridge the gap between current learning achievements and agreed goals It is however more questionable whether adequate opportunities are given to students to be active participants in closing what has been termed the loop Contributors to this book have responded in different ways to the challenge of enhancing learning through assessment offering reasons for the lack of focus on learning within assessment processes as well as suggesting possible solutions The chapters demonstrate a balance between innovation and practicality drawing on the underpinning theories The result is both rich in discussion and an extremely useful resource for practitioners This book was originally published as a special issue of Assessment Evaluation in Higher Education **How to Write Essays & Assignments**

J. Mira Kopell, 2023-10-20 Through a series of carefully designed writing workshops this book guides the screenwriter through the messy creativity of screenwriting Drawing on over 20 years experience facilitating screenwriting workshops author J Mira Kopell provides readers with a path to screenwriting that makes space for reflection critique and exploration Structured around five specific writing assignments each assignment supports the writer forward incrementally by focusing on a specific set of craft elements needed to then move them on to the next A key value of the assignments is that they are not exercises but steps in the development of the writer s own screenplay By using this book readers can both receive meaningful feedback on their own project and learn to give insightful focused critiques of their fellow writer s work Rather than offering craft as a to do list that promises successful scripts this book reimagines craft as tools not rules empowering a writer to let their unique story dictate choices in order to support their work and honor their own voice This book is ideal for students and lecturers of screenwriting groups of writers looking to form their own workshops and aspiring professionals wanting to develop their craft Handbook of Child Behavior Therapy T.
