**Excellence** McLean, Robert ,Tijssen, Robert,Wallace, Matthew L.,Kraemer-Mbula, Erika,2020-01-18 Modern day science is under great pressure A potent mix of increasing expectations limited resources tensions between competition and cooperation and the need for evidence based funding is creating major change in how science is conducted and perceived Amidst this perfect storm is the allure of research excellence a concept that drives decisions made by universities and funders and defines scientists research strategies and career trajectories But what is excellent science And how to recognise

it After decades of inquiry and debate there is still no satisfactory answer Are we asking the wrong question Is reality more complex and excellence in science more elusive than many are willing to admit And how should excellence be defined in different parts of the world particularly in lower income countries of the Global South where science is expected to contribute to pressing development issues despite often scarce resources Many wonder whether the Global South is importing with or without consenting the flawed tools for research evaluation from North America and Europe that are not fit for purpose This book takes a critical view of these issues touching on conceptual issues and practical problems that inevitably emerge when excellence is at the center of science systems Emerging from the capacity building work of the Science Granting Councils Initiative in sub Saharan Africa it speaks to scholars as well as to managers and funders of research around the world Confronting sticky problems and uncomfortable truths the chapters contain insights and recommendations that point towards new solutions both for the Global South and the Global North **Annual Review of**

**Comparative and International Education 2022** Alexander W. Wiseman,2023-12-14 Reflecting on ten prolific years of publication both volumes of the 2022 Annual Review together present discussions on education trends and directions conceptual and methodological developments research to practice area studies and regional developments and diversification of the field of education **Achieving sustainable production of milk Volume 2** Dr Nico van Belzen,2017-06-06

Summarises current research on pathogenic risks affecting milk and ways they can be controlled on the farm Reviews ways of measuring and reducing the environmental impact of dairy farming such as better grassland management Assesses the wider role of dairy farming and how it can be improved in the developing world *Clinical Epidemiology of Chronic Liver Diseases* Robert J. Wong,Robert G. Gish,2018-10-24 This book emphasizes the clinical epidemiology of chronic liver diseases with a specific focus on the methodology of the discussed studies The whole spectrum of liver diseases is covered from chronic hepatitis B and C to hepatocellular carcinoma alcoholic and non alcoholic fatty liver diseases and autoimmune and cholestatic liver diseases Readers will find the most up to date information on clinical epidemiology of hepatology and will also be able to learn about important methodology and biostatistics information Each chapter contains a summary table at the end of each chapter that highlights the most relevant landmark studies their main outcomes and the unique features of the methodology The book will appeal to both practicing clinicians as well as clinical research investigators In addition this would likely be of interest to medical school or public health school students to learn about hepatology epidemiology but also some specific fundamentals of clinical research and clinical epidemiology **North-South Knowledge Networks Towards**

**Equitable Collaboration Between** Tor Halvorsen,Jorun Nossun,2017-02-23 Since the 1990s internationalisation has become key for institutions wishing to secure funding for higher education and research For the academic community this strategic shift has had many consequences Priorities have changed and been influenced by new ways of thinking about universities and of measuring their impact in relation to each other and to their social goals Debates are ongoing and hotly

contested In this collection a mix of renowned academics and newer voices reflect on some of the realities of international research partnerships They both question and highlight the agency of academics donors and research institutions in the geopolitics of knowledge and power The contributors offer fresh insights on institutional transformation the setting of research agendas and access to research funding while highlighting the dilemmas researchers face when their institutions are vulnerable to state and donor influence Offering a range of perspectives on why academics should collaborate and what for this book will be useful to anyone interested in how scholars are adapting to the realities of international networking and how research institutions are finding innovative ways to make NorthSouth partnerships and collaborations increasingly fair sustainable and mutually beneficial Gender and Practice Vasilikie (Vicky) Demos, Marcia Texler Segal, Kristy E.

Kelly, 2019-09-30 In *Gender and Practice* Insights from the Field twelve chapters contribute to the creation of an accessible body of knowledge that looks to provide gender practitioners with examples of what works and what doesn't in the attainment of gender equality *High quality design on a low budget* Dorothea Sommer, Janine Schmidt, Stefan

Clevström, 2016-03-07 This publication brings together a range of building projects from National Academic and Public Libraries from different countries of the world showing how these libraries are able to continue to provide high quality library space that is affordable in times of difficult economic circumstances We will hear about the building processes co operation with architects and engineers and how librarians and users have reacted to these new buildings **The Least Cost Path From Landscape Genetics to Landscape Genomics** Samuel A. Cushman, Andrew J. Shirk, Glenn T.

Howe, Melanie A. Murphy, Rodney J. Dyer, Stéphane Joost, 2018-08-03 Ecosystems are the stage on which the play of evolution is acted and ecosystems are complex spatially structured and temporally varying The purpose of this Research Topic is to explore critical challenges and opportunities for the transition from landscape genetics to landscape genomics Landscape genetics has focused on the spatial analysis of small genetic datasets typically comprised of less than 20 microsatellite markers taken from clusters of individuals in putative populations or distributed individuals across landscapes The recent emergence of large scale genomic datasets produced by next generation sequencing methods poses tremendous challenge and opportunity to the field Perhaps the greatest is to produce process curate archive and analyze spatially referenced genomic datasets in a way such that research is led by a priori hypotheses regarding how environmental heterogeneity and temporal dynamics interact to affect gene flow and selection The papers in the Research Topic cover a broad range of topics under this area of focus from reviews of the emergence of landscape genetics to best practices in spatial analysis of genetic data The compilation like the emerging field itself is eclectic and illustrates the scope of both the challenges and opportunities of this emerging field *Annual Budget Monitoring Report* Uganda, 2015 Uganda Jörg Wiegratz, Giuliano

Martiniello, Elisa Greco, 2018-11-15 For the last three decades Uganda has been one of the fastest growing economies in Africa Globally praised as an African success story and heavily backed by international financial institutions development

agencies and bilateral donors the country has become an exemplar of economic and political reform for those who espouse a neoliberal model of development The neoliberal policies and the resulting restructuring of the country have been accompanied by narratives of progress prosperity and modernisation and justified in the name of development But this self celebratory narrative which is critiqued by many in Uganda masks the disruptive social impact of these reforms and silences the complex and persistent crises resulting from neoliberal transformation Bringing together a range of leading scholars on the country this collection represents a timely contribution to the debate around the New Uganda one which confronts the often sanitised and largely depoliticised accounts of the Museveni government and its proponents Harnessing a wealth of empirical materials the contributors offer a critical multi disciplinary analysis of the unprecedented political socio economic cultural and ecological transformations brought about by neoliberal capitalist restructuring since the 1980s The result is the most comprehensive collective study to date of a neoliberal market society in contemporary Africa offering crucial insights for other countries in the Global South
