Health Geography in Sub-Saharan Africa Joseph Asumah Braimah, Elijah Bisung, Vincent Kuire, 2023-08-22 This volume creates a platform to showcase health geography research from countries in sub Saharan Africa SSA and draws on theoretical and methodological innovations to initiate a discussion on the complexities of the issues impacting health in the region Through theoretically and empirically grounded contributions from a variety of researchers working across SSA the book addresses a wide range of topics that are usually treated separately when discussing health geography in the region By bridging the social science and health disciplines the book introduces new ways of thinking temporally and spatially about these topics in non geography contexts as well In 4 sections the text will broadly appeal to students researchers teachers policy makers and global health professionals Section 1 addresses the social determinants of health including gender disability and other inequities and inequalities associated with healthcare access Section 2 discusses the environmental determinants of health such as food security water and sanitation mining and climate change Section 3 focuses on current and emerging challenges to health in SSA including ageing non communicable disease and infectious diseases Section 4 concludes the text by discussing the need to develop social and environmental intervention policies and strategies to address health challenges in SSA

**Down to Earth** National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Mapping Science Committee, Committee on Geography, Committee on the Geographic Foundation for Agenda 21, 2002-10-24 In 1992 world leaders adopted Agenda 21 the work program of the 1992 U N Conference on Environment and Development This landmark event provided a political foundation and action items to facilitate the global transition toward sustainable development The international community marked the tenth anniversary of this conference in Johannesburg South Africa in August 2002 Down to Earth a component of the U S State Department s Geographic Information for Sustainable Development project for the World Summit focuses on sub Saharan Africa with examples drawn from case study regions where the U S Agency for International Development and other agencies have broad experience Although African countries are the geographic focus of the study the report has broader applicability Down to Earth summarizes the importance and applicability of geographic data for sustainable development and draws on experiences in African countries to examine how future sources and applications of geographic data could provide reliable support to decision makers as they work towards sustainable development The

committee emphasizes the potential of new technologies such as satellite remote sensing systems and geographic information systems that have revolutionized data collection and analysis over the last decade

**Aid from International Ngos** Dirk-Jan Koch, 2009 International NGOs are increasingly important players within the new aid architecture but their geographic choices remain uncharted territory This book focuses on patterns of development assistance mapping while analysing and assessing the country choices of the largest international NGOs Koch's approach is interdisciplinary and uses qualitative quantitative and experimental methods to provide a clear insight in the determinants of country choices of international NGOs The book aims to discover the country choices of international NGOs how they are determined and how they could be improved This work which uses a dataset created specifically for the research comes to the conclusion that international NGOs do not target the poorest and most difficult countries They are shown to be focussing mostly on those countries where their back donors are active Additionally it was discovered that they tend to cluster their activities for example international NGOs also have their donor darlings and their donor orphans Their clustering is explained by adapting theories that explain concentration in for profit actors to the non profit context The book is the first on the geographic choices of international NGOs and is therefore of considerable academic interest especially for those focusing on development aid and third sector research Furthermore the book provides specific policy suggestions for more thought out geographic decisions of international NGOs and their back donors

*Crowdsourced Geographic Information Use in Government* Mordechai Haklay; Vyron Antoniou; Sofia Basiouka; Robert Soden; Peter Mooney, The acceptance of volunteered geographic information VGI as a valued and useful source of information for governments is growing at all levels Put simply VGI is crowdsourced geographic information provided by a wide range of participants with varying levels of education knowledge and skills see Michael Goodchild's writing for the original definition of the term While a growing body of research demonstrates the reliability and accuracy of VGI when compared to official or government produced data sets the progression towards their adoption and wider use is slow There are a range of mechanisms and methods available for ensuring that crowdsourced information is fit for purpose so concerns about data quality are not the major reason for the lack of adoption Instead organizational practices regulations and legal issues limit the rate of change This report is based on a six month study of the use of VGI by government and aims to provide a guide for the successful implementation of VGI

*Access to Geography: Development* Garrett Nagle, 2005-03-31 Development provides an in depth assessment of where the world is today by considering a wide range of factors which contribute to the overall development of a country and then looks forward to the future and what that holds The book includes sections on development and underdevelopment past and present strategies for development the effect of development on population food supply urbanisation industrialisation and the environment and sustainable development

*Practicing Health Geography* Prestige Tatenda Makanga, 2021-05-05 This volume uniquely presents case studies on health geography in Africa and analyzes health practices in different African

regions to illustrate a unified perspective to the geographies of health. The book describes various contemporary and traditional themes that have characterized the discipline of health geography and uses its 13 case studies across 14 chapters to challenge the perceived dichotomy between health geography and medical geography among health researchers and practitioners. In 3 sections the book provides readers with a comprehensive and interdisciplinary approach to understanding health geography in Africa. The first chapter introduces the major theories and perspectives in health geography and how these characteristics apply to health geography practices in Africa. Section 1 discusses the different uses of space based analyses in health geography including geo data infrastructures, geographies of disease burden, spatial epidemiology, spatially precise public health and spatial access to health. Section 2 discusses the different uses of place based analyses in health geography including health representation, healthcare access, food allergies and health determinants. Section 3 addresses how geography is incorporated into decision processes in Africa and how policy planning shapes health related interventions at the population and individual level. The case studies here discuss geo enabling health records, health policy, public health planning and mobile health geographies.

A TEXTBOOK OF URBAN PLANNING AND GEOGRAPHY SHARMA, SAMEER, 2020-11-01. Generally, textbooks on urban geography and urban planning are based on ideas laid out in the west and are unable to explicitly connect those ideas to the way Indians experience their cities. This gap is addressed in this book by reconceptualising Indian urban studies. The reconceptualisation is done by dissecting western theories, concepts, paradigms and principles and practices and placing them alongside how Indians experience their urban landscapes. Such a comparative analysis allows readers to break from their past understandings of the structure and dynamics of Indian cities as well as enable researchers to make exploratory hypotheses. The book will empower students to craft and implement new approaches unconstrained by orthodox theories and biases. Primarily intended for the students of Geography and Urban Planning, the book covers the evolution of urban structures and dynamics of settlements in India largely after India's Independence. There are seven chapters in the book. First three chapters describe and explain the evolution of Indian settlements up to the present. The next four chapters focus on regions, urban planning, urban governance and the social landscape of Indian cities. Each chapter ends with a set of short and long answer questions.

**KEY FEATURES** Large coverage of the syllabi prescribed in Indian academic institutions. Strategically organised text of each chapter for the ease of learning. Abundant case studies in each chapter. Chapter end short answer, long answer and fill in the blank type exercise problems.
