

The background of the slide is a photograph of the Golden Gate Bridge in San Francisco. The bridge's iconic red-orange towers and suspension cables are visible against a blue sky with scattered white clouds. In the foreground, there are green, hilly slopes with some trees and a dirt path. The water of the bay is visible at the base of the bridge.

Laguna, Johan Marklund, 2018-12-07 *Business Process Modeling Simulation and Design Third Edition* provides students with a

comprehensive coverage of a range of analytical tools used to model analyze understand and ultimately design business

processes The new edition of this very successful textbook includes a wide range of approaches such as graphical

flowcharting tools cycle time and capacity analyses queuing models discrete event simulation simulation optimization and

data mining for process analytics While most textbooks on business process management either focus on the intricacies of

computer simulation or managerial aspects of business processes this textbook does both It presents the tools to design

business processes and management techniques on operating them efficiently The book focuses on the use of discrete event simulation as the main tool for analyzing modeling and designing effective business processes The integration of graphic user friendly simulation software enables a systematic approach to create optimal designs      Construction Digitalisation Douglas Aghimien,Clinton Aigbavboa,Ayodeji Oke,Wellington Thwala,2021-07-25 This book explores construction digitalisation particularly in developing countries The book conceptualises a digitalisation capability maturity model that will enable construction organisations to self assess and benchmark their digital capabilities in their quest for digital transformation Digitalisation offers a significant solution to the age long problems of the construction industry Research shows that when construction organisations transform from a traditional service delivery approach to a more digitalised approach significant improvement in project delivery and better competitive advantage for these organisations will be attained The attainment of these benefits is evident in developed countries where the digitalisation of construction activities continues apace Unfortunately the story is not the same for construction organisations in developing economies While some organisations might be willing to be digitally transformed most have no clue how to go about it To this end this book provides guidelines for construction organisations seeking to transform their entities digitally Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries      **ICD-10-CM/PCS**
