Managerial Accounting for Strategic Decision Making, Preliminary Edition Charles E. Davis, Elizabeth B. Davis, 2010-10-18 Business professionals that need to gain a stronger understanding of key accounting concepts will appreciate this book's approach It focuses on the core concepts framed within the context of one company C C Sports and its supply chain Through this example they'll learn fundamentals of how a business operates along with the type of decisions that managers must make on a daily basis Focus On mini chapters incorporate streamlined complete coverage of certain topics Reinforcing examples and exercises are also included to enable business professionals to assess their level of understanding before progressing to more advanced discussions

Heuristic Reasoning in Management Accounting Jörn Sebastian Basel, Jörn Basel, 2012 Heuristics are short cuts and deliberately ignore information for instance through examining fewer cues or integrating less information However this collides with a view on management accountants and controllers as rational agents which seems to suggest that all available information should be considered As their role as information supplier is often accompanied with the task to assist managers in their judgment and decision making they have huge influence on these processes Therefore it is of high relevance to know if how and which heuristics management accountants and controllers use Furthermore we need to know which individual and situational factors influence their usage of heuristics With a series of five empirical studies applying a mixed methods research design the author sheds light to these research questions and addresses some central claims of the potential biases but also the stunning benefits of relying on heuristic reasoning Central to his discussion are dual process approaches which are debated in cognitive psychology Scholars of these approaches claim that we should distinguish between two distinct processes or systems of the human mind Following this interpretation heuristics are processes which are described as intuitive automatic fast and unconscious They are routinized cognitive processes which are based on experience in certain social environments and thus often exhibit ecological rationality Overall this book picks up an up to date topic in behavioural accounting research which not only is of relevance for researchers but as well for practitioners
