Environmental Law Vasilka Sancin, 2012 The Stockholm Declaration and Law of the Marine Environment Myron H. Nordquist, John Norton Moore, Said Mahmoudi, 2021-10-18 This collection of essays commemorates the Thirtieth Anniversary of the 1972 Stockholm Declaration on the Human Environment The opening presentation is by the distinguished former Foreign Minister of Sweden Dr Hans Blix a primary author of the Stockholm Declaration A second keynote abstract is by Professor Bjorn Lomborg the renowned author of *The Skeptical Environmentalist* The third keynote essay is by the United Nations Under Secretary General of Legal Affairs Hans Correl The remainder of the volume includes contributions by six judges from the International Tribunal for the Law of the Sea the Secretary General of the International Seabed Authority senior representatives from the Food and Agriculture Organization International Maritime Organization World Bank Swedish Foreign Ministry and United States Department of State along with 25 professors and environmental law experts from 15 countries The collection provides a comprehensive in depth review of the historic achievement as well as current relevance of the 1972 Stockholm Declaration as a landmark achievement in international environmental law Environmental Problems in Coastal Regions VI C. A. Brebbia, 2006 This volume deals with problems related to monitoring analysis and modelling of coastal regions including sea land and air phenomena Bringing together papers presented at the Sixth International Conference on Environmental Problems in Coastal Regions the book focuses on ecological and environmental problems and the issues of water quality The book will be essential to researchers engineers and professionals involved in the field of Coastal Environmental quality and the related challenges to monitoring and controlling Oil Spills Topics of interest include Remote Sensing Ecology and the Coastal Environment Water Quality Issues Wetlands Sediment Problems Coastal Restoration Atmospheric Aspects Sea States Forecasting Modelling of Trajectory and Fate of Spills Bioremediation Detection Prevention and Clean up Measures Erosion Problems Management of Risk Preservation of Pristine Coastal Areas Estuarial Problems Floods Climate Change and the Coastal Environment *International Marine Environmental Law and Policy* Daud Hassan, Saiful Karim, 2018-10-03 Several disturbing issues pose a threat to the marine environment and its wellbeing among them marine environmental pollution and degradation of marine biodiversity Most troubling is that these issues are overwhelmingly caused by human activities which are sometimes transboundary and their consequences will become more severe and complicated if not properly curbed Thus these activities require comprehensive policies laws and principles to manage them effectively Linked to these solutions is the need for responsibilities cooperation and commitments at local national regional and international levels Contemporary Marine Environmental Law and Policy presents a thorough appraisal of the main issues actors and institutions engaged in the legal aspects of marine environmental conservation With contributions from an international range of authors the book provides a concise account of the legal and policy framework underlying international marine environmental issues and of the fundamental concepts and strategies that are important to the protection of the marine environment Some of the topics explored include the prevention of marine pollution caused by

land based activities ships and offshore hydrocarbon and mineral resources exploration the conservation and management of marine living resources the marine environment in the polar regions and the settlement of marine environmental disputes This book provides a solid foundation for anyone studying International Environmental Law and the Law of the Sea It will also appeal to anyone seeking to gain a deeper understanding of this hugely important subject Coastal Deposits: Environmental Implications, Mathematical Modeling and Technological Development Marta Pérez-Arlucea, Rita González-Villanueva, 2021-08-17 This Special Issue on Coastal Deposits Environmental Implications Mathematical Modeling and Technological Development includes seven high quality innovative research papers dealing with many scientific aspects regarding the coast through mathematical modelling and innovative techniques in the study and preservation of the coastline from erosion such as coastal watch camera installations remote sensing the use of biocementation or analytical techniques to assess incompatibilities in the sustainable use of the coast including worrying issues as pollution of the marine environment and ecosystem deterioration Environmental Impacts of Aquaculture Kenneth D. Black, 2001 The continued expansion of aquaculture in a wide range of environments and of a growing number of species has lead to increasing demands on aquatic resources These demands vary with the culture species the culture method and the environmental and ecological setting While there are many examples of efforts to mitigate detrimental environmental effects the environment remains the ultimate constraint on the future sustainable development of this maturing industry The relationships between the activities of aquaculture and the environment are therefore of economic importance as well as of scientific interest and for these reasons a large international research community has developed over the past decade In this volume the resultant research is synthesised and critically reviewed providing a source of reference to the most important recent developments at research and professional level The authors are internationally recognised authorities who have made significant contributions to their respective research areas The first part of the volume is organised in terms of the major culture types This is followed by chapters of general relevance to aquaculture The volume is designed to complement *Biology of Farmed Fish* eds K D Black A D Pickering also published in this series It is directed at fish biologists shellfish biologists and environmental scientists working in the academic governmental and industrial sectors **Perspectives on Integrated Coastal Zone Management** Wim Salomons, Kerry Turner, Luiz D. de Lacerda, S. Ramachandran, 2012-12-06 All coastal areas are facing a growing range of stresses and shocks the scale of which now poses threats to the resilience of both human and environmental coastal systems Responsible agencies are seeking better ways of managing the causes and consequences of the environmental change process in coastal zones This volume discusses the basic principles underpinning a more integrated approach to coastal management and highlights the obstacles that may be met in practice in both developed and developing countries Successful strategies will have to encompass all the elements of management from planning and design through financing and implementation as highlighted in this book Environmental Science in the Coastal Zone National Research

Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Commission on Geosciences, Environment, and Resources, 1994-02-01 This book assesses the dimensions of our scientific knowledge as it applies to environmental problems in the coastal zone The volume contains 10 papers that cover different aspects of science management and public policy concerning the coastal zone A consensus is presented on several key issues confronting science for developing a more holistic approach in managing this region's intense human activities and important natural resources
