New York for Sale Tom Angotti, 2011-02-25 How community based planning has challenged the powerful real estate industry in New York City Remarkably grassroots based community planning flourishes in New York City the self proclaimed real estate capital of the world with at least seventy community plans for different neighborhoods throughout the city Most of these were developed during fierce struggles against gentrification displacement and environmental hazards and most got little or no support from government In fact community based plans in New York far outnumber the land use plans produced by government agencies In *New York for Sale* Tom Angotti tells some of the stories of community planning in New York City how activists moved beyond simple protests and began to formulate community plans to protect neighborhoods against urban renewal real estate mega projects gentrification and environmental hazards Angotti both observer of and longtime participant in New York community planning focuses on the close relationships among community planning political strategy and control over land After describing the political economy of New York City real estate its close ties to global financial capital and the roots of community planning in social movements and community organizing Angotti turns to specifics He tells of two pioneering plans forged in reaction to urban renewal plans including the first community plan in the city the 1961 Cooper Square Alternate Plan a response to a Robert Moses urban renewal scheme struggles for environmental justice including battles over incinerators sludge and garbage plans officially adopted by the city and plans dominated by powerful real estate interests Finally Angotti proposes strategies for progressive inclusive community planning not only for New York City but for anywhere that neighborhoods want to protect themselves and their land *New York for Sale* teaches the empowering lesson that community plans can challenge market driven development even in global cities with powerful real estate industries

Black Corona Steven Gregory, 2011-03-28 In *Black Corona* Steven Gregory examines political culture and activism in an African American neighborhood in New York City Using historical and ethnographic research he challenges the view that black urban communities are socially disorganized Gregory demonstrates instead how working class and middle class African Americans construct and negotiate complex and deeply historical political identities and institutions through

struggles over the built environment and neighborhood quality of life With its emphasis on the lived experiences of African Americans *Black Corona* provides a fresh and innovative contribution to the study of the dynamic interplay of race class and space in contemporary urban communities It questions the accuracy of the widely used trope of the dysfunctional black ghetto which the author asserts has often been deployed to depoliticize issues of racial and economic inequality in the United States By contrast Gregory argues that the urban experience of African Americans is more diverse than is generally acknowledged and that it is only by attending to the history and politics of black identity and community life that we can come to appreciate this complexity This is the first modern ethnography to focus on black working class and middle class life and politics Unlike books that enumerate the ways in which black communities have been rendered powerless by urban political processes and by changing urban economies *Black Corona* demonstrates the range of ways in which African Americans continue to organize and struggle for social justice and community empowerment Although it discusses the experiences of one community its implications resonate far more widely Some images inside the book are unavailable due to digital copyright restrictions
