Unyielding Thomas L. Rempfer,2024-06-11 Unyielding tackles a recurring topic of national importance as a history lesson for future generations Controversial illegal medical mandates impacted military populations for many decades but it was not until the COVID era that the American people witnessed similar overreach Colonel Tom Buzz Rempfer s memoir retraces the anthrax vaccine history since it marked the first time the military was served with court rulings condemning premeditated illegal experimentation on our nation s troops The advent of COVID mandates imposed on the population in 2021 gave the American people a taste of the mistreatment previously reserved for

our nation's warriors. Legal protections enacted by the Congress to guard against medical experimentation meant to ensure safe effective and FDA approved products were instead adulterated to foist mandates on American society. According to the FBI the motive for the anthrax letter lab leaks in 2001 was to rejuvenate the failing anthrax vaccine. Similarly the suspected Wuhan lab leak two decades later resulted in a push for COVID injections. The pattern of fear based bioincidents resulting from reckless biodefense enterprises and lessons not learned with illegal mandates paralyzed government and military leaders while wreaking havoc on the trust and health of our troops and the American people. Buzz's decades long analysis of the breakdowns stands as a unique treatise on the failures of leaders to learn lessons from these enduring clashes and to correct the damage. Future generations will sort out the aftermath but in the meantime Colonel Rempfer's Unyielding effort attempts to ensure that the lessons are not lost.

Aeromedical Psychology Carrie H. Kennedy, Gary G. Kay, 2017-11-01. Aeromedical psychology is that branch of psychology pertaining to the assessment selection and evaluation of aviation personnel. This book *Aeromedical Psychology* is designed to provide the means for a variety of clinicians to carry out sound assessment and selection procedures perform informed evaluations and make subsequent recommendations regarding flight status and treatment strategies geared to the aviation environment. To facilitate a dynamic understanding of the field the book emphasizes an integration of applications and theory case examples and research. The book is divided into three parts. The first presents assessment and selection procedures for aviation personnel i.e. air traffic controllers flight officers and pilots and astronauts and the many ways in which both psychologists and psychiatrists are involved in these roles. In the second part the waiver standards put forth by both the FAA and the various branches of the military are presented as well as the waiver decision process. Clinical issues unique to aviation notably fear of flying motivation to fly and airsickness are addressed as well as possible courses of intervention treatment and disposition. In the final part more specialized issues pertaining to aeromedical psychology are dealt with namely the psychopharmacological research and regulations applicable to recreational pilots and aviation.
