 Forms* Achill Schurmann, 2009 Starting from classical arithmetical questions on quadratic forms this book takes the reader
 step by step through the connections with lattice sphere packing and covering problems As a model for polyhedral reduction
 theories of positive definite quadratic forms Minkowski's classical theory is presented including an application to
 multidimensional continued fraction expansions The reduction theories of Voronoi are described in great detail including full
 proofs new views and generalizations that cannot be found elsewhere Based on Voronoi's second reduction theory the local
 analysis of sphere coverings and several of its applications are presented These include the classification of totally real thin
 number fields connections to the Minkowski conjecture and the discovery of new sometimes surprising properties of
 exceptional structures such as the Leech lattice or the root lattices Throughout this book special attention is paid to
 algorithms and computability allowing computer assisted treatments Although dealing with relatively classical topics that
 have been worked on extensively by numerous authors this book is exemplary in showing how computers may help to gain
 new insights BOOK JACKET *Proactivity at Work* Sharon K. Parker, Uta K. Bindl, 2016-12 By providing insight on key
