Black and Blue Carol Mavor, 2012-09-25 Postwar French works that register disturbing truths about loss and regret and violence and history through aesthetic refinement anchor this exquisite image filled rumination on efforts to capture fleeting moments and comprehend the incomprehensible The Genesis of the Symbolic Arno Schubbach, 2021-11-22 Ernst Cassirer's philosophy of culture has been much discussed in recent years However it remains unclear how it evolved from his older theory of knowledge This study deals with this question on the basis of Cassirer's disposition of a philosophy of the symbolic reconstructed here for the first time This text shows that the symbolic refers to culture as a whole and to its inherent diversity Therefore the symbolic includes the relationship between the general transcendental conditions of culture and its empirical specificities in language and languages art and the arts myth and myths science and disciplines Cassirer does not comprehend this empirical and specific reality of symbolization depending on pre-existing transcendental conditions Instead he proceeds from the empirical diversity of the symbolisations and reflects on their simultaneously general and specific conditions Thus Cassirer embarks on a path that he finds paved in Kant's Critique of Judgement He consequently defines the symbolic as the horizon for a reflective approach based on empirical findings and not as the foundation of a systematic derivation of the diversity of culture in the style of the idealistic tradition **A Bookman's Catalogue Vol. 1 A-L** T. including what ethical conclusions might most reasonably be drawn from such thought Accessible and diverse this extensive volume contains chapters from the perspective of history ecology psychotherapy poetry mythology and an especially strong representation of continental philosophy and Jungian depth psychology Due to its multi disciplinary nature the book represents an unparalleled discussion of the meanings and implications of holism Written by an innovative and international calibre of contributors this pioneering collection will be essential reading for practitioners in depth psychology and scholars of Jungian studies as well as academics and students of philosophy religious studies spirituality history and the history of ideas The book is a rich resource for the enhancement of critical reflection among all those with an interest in holism
