Between Teaching and Caring in the Preschool John C. Pruitt, 2020-07-06 In *Between Teaching and Caring in the Preschool* John C. Pruitt argues that preschool teaching is more than a set of roles and duties tied to institutional expectations. Drawing on two years of ethnographic fieldwork, twenty-three interviews, and countless conversations with preschool teachers and analysis of preschool documents, Pruitt opens the black box of the preschool to show the complexity of the preschool teacher identity as it unfolds in everyday practices of teaching and caring. His analysis of preschool teachers' talk and interaction addresses pertinent sociological and early childhood education themes including classroom management, social control, emotions, and identity construction. He demonstrates there is more going on in the preschool than teaching young children and caring for them. Through practices of classroom management and teaching language, preschool teachers socialize children into education contexts and exert social control in and through teaching practices. By managing emotions, preschool teachers also manage impressions of themselves and the preschool. He also shows how preschool teachers use resources like Montessori pedagogy and their lived experience to construct authenticity. Pruitt concludes that institutions such as ECE shape identities within and away from the institution.

New Kid in School Debra Rader, Linda Harris Sittig, 2003 This book provides educators and support staff with viable and inspired ways to meet the particular needs of children in transition. This ground-breaking volume provides a model of transition education that can be used in all elementary schools, public, independent, and international, and is easily integrated into an existing curriculum. The authors have chosen quality children's literature as a springboard for learning about transitions and have developed excellent follow-up activities to use in the classroom and creative ideas for cross-curricular connections. Appendices include Children's Literature Resources, Suggested Resources Related to Transition, and Tips for Parents.

Survival Skills for the New Elementary Teacher Jeannette M. Konior, 2005-03-27 Every year thousands of new teachers graduate all hoping to obtain their dream job in the school district of their choice. They have been given a great education at their respective universities. In addition to the usual academics, they have learned educational theory, development, lesson planning, methodology, etc. But very few learn about the more practical side of education in the classroom, the tricks of the trade. Student teaching provides an opportunity to learn some of these things, however, not all circumstances come up in one or two experiences. In most cases, the new teacher enters the work force a true novice whose confidence is shaken when it becomes obvious how much is not known. This book concentrates on elementary education. Here you will find answers to questions you may have asked on classroom management, discipline, organization, testing, and grading, talking to parents, and much more. The teacher is the catalyst who puts all these things in motion. The teacher as classroom leader must be decisive, compassionate, ready, clear, and to the point, and above all, professional.
